

Declaration Letter

Dec. 29, 2015

FCC ID: SLE-WAPA003

Product: IEEE 802.11a/b/g miniPCI module

Model: WAPA003

This change will be limited used for Wifi 2.4GHz by firmware control. The limited firmware is set by manufacture before shipping to customer to avoid they misuse for 5GHz. We will check the integrity and the encrypted firmware header to make sure only Moxa-provided firmware can be loaded to the device. This restriction cannot be modified by end users, and is unaffected by factory reset.

Sincerely,

Owen Chang / Assistant Manager
MOXA Inc.
