

Announcement

The company is committed to constantly improving and perfecting the performance of the product and strengthening the functions of the product. Pictures and functions presented in the guide are all based on the actual product and the ex-works configuration, and the company reserves the right to modify the functions and man-machine interfaces described in this manual without prior notice, so please take the actual product as the final say.

You are requested to properly keep your equipment. This company will not take responsibility for any loss caused by the false operation or repair of hardware and software or any loss caused by personal information leakage to any third party. This company will neither take responsibility for any accidental loss that may happen during the use of this manual nor for any claim made by any third party due to the use of the product.

The function descriptions of the product have already been carefully examined and proofread by our working staff and your understanding is appreciated in case of any omission. Please visit the company website for more product briefs and value-added services: en.jmgo.com.

Safety Instruction

Before use, please carefully read the product guide and properly keep the product so as to ensure the need of emergency use;

During projection operation, do not block the air inlet or outlet of the product so as to prevent damage to the product due to overheating;

The product must not fall from height or be knocked, which may cause damage to it;

To avoid damage to your eyes, please do not look the lens of the machine in the eye;

For any problem observed, please do not disassemble the product by yourself and contact the professional after-sales service personnel for assistance.

Product Brief

Dear JMGO fans,

Thank you for purchasing JMGO product! JMGO is invested by famous Chinese movie stars Ren Quan, Li Bingbing and Huang Xiaoming. It adopts the concept of high definition projection combined with smart chip and astonishing sound quality, and is suitable for both domestic use and portable use, thus providing you with a life of clear, refined and genuine large-screen based audio & video effect.

Before use of the product, please carefully read this product manual and properly keep the equipment during daily use for the convenience of better future use.

Chairman of the
Board:

List of Components

Host

Remote control

Power adaptor

Magnetic sucker
data line

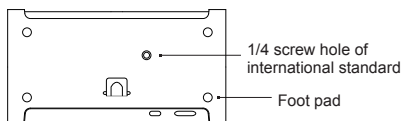

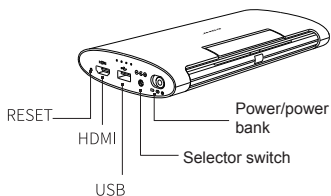

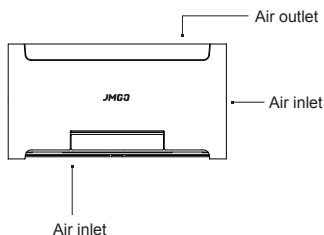

Cleaning cloth

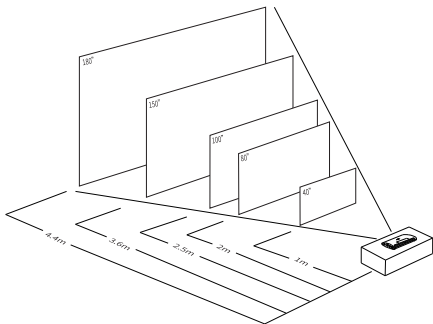

Specification

- Remarks: Thank you for purchasing the product of the company. Please check whether the product you received is consistent with the list; if any discrepancy observed between the product or accessories and the component list, please do not hesitate to contact the customer service of JMGO.

1 Appearance and Functions of Host

2 Distance and Projection Size

- The distance between the lens and the screen, the zoom setting and the video format will all impact the size of the projected picture.
- The best project distance of JMGO product is about 0.5m-2.5m, out of which the brightness and definition of projection will be compromised and the projection result will be affected.
- Projection size is proportional to projection distance: The longer the distance is the bigger the projection size will be, but the definition will be compromised accordingly; the user may choose the proper projection distance according to their actual need.

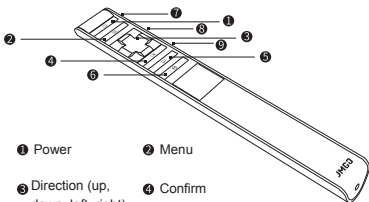

3 Indicator

Four white indicator lights:

- Charged state: turn on the power and the white indicator lights will flicker slowly; then they will be lightened according to battery capacity.
- Project state when the adapter is disconnected: the indicator lights will go out.
- When it is used as a power bank to charge the equipment: the white indicator lights will be normally on; an indicator light will be off when the battery meter shows one bar of power used till all indicator lights are off.

4 Remote Control

- The remote control card in front of the lens can protect the lens. Please reset the card after turning off the projector.

■ Remarks:

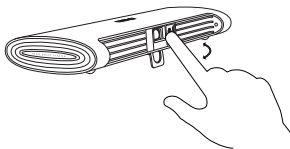

1. There should be no obstacles between JMGO products when the user is operating the remote control;
2. It is best to operate the remote control in the face of the machine. Please do not use it in a big angle of inclination;
3. Press and hold the menu button to view the shortcut menu;

- If batteries of the remote control need to be replaced, please press the position shown below vertically and take the battery cover down.

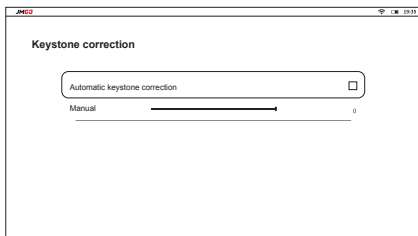

5 Focus Adjustment

This product can make the projected pictures reach the best definition through manual focusing with the focusing roller.

6 Keystone Correction

Find out Desktop Application >Setting> Image > Keystone Correction. In case of projection inclination observed during the use, the keystone correction function can be used to make the projection produce a standard square image.

7 3D Play

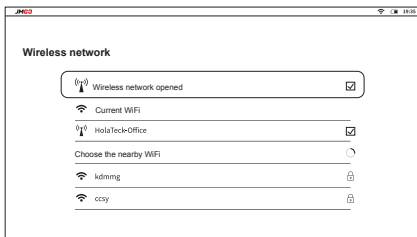

When playing 3D films, the mode of 3D film source can be set at the shortcut menu of the player interface which can be called out but giving a slight press on the JMGO button of remote control.

8 Network Setting

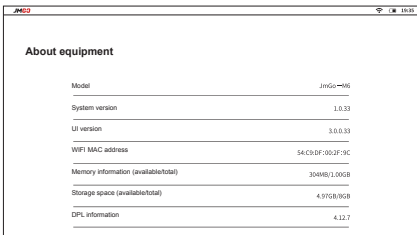

This product supports wireless WiFi network:

- Wireless setting, find out Setting>General Setting>Network Connection and chose the usable network for WiFi connection.

9 System Version

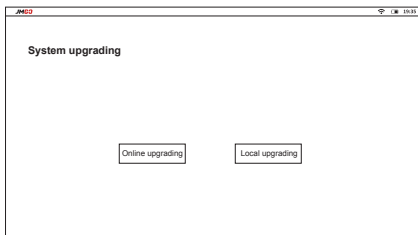

Find out Setting> System Setting>About Equipment and view system information of the host.

10 System Upgrading

This product supports both online upgrading and local upgrading:

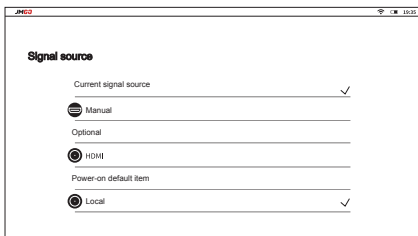

- Online upgrading: Find out the Setting menu at the desktop and successively enter into “General Setting”→“Version Upgrading” →“System Upgrading”, then the system will automatically detect whether the system is in the latest version. If the current system is already the latest version, the system will indicate the same, while if it is not the latest version, the system will ask whether to upgrade it.
- Remarks: JMGO will constantly provide the online upgrading and maintenance of product and may deliver system upgrading service online without prior notice so as to provide the latest software system and services for your equipment.
- Local upgrading: Download the software upgrading package at the company website and copy it to the root directory of portable hard drive or USB drive, and plug the drive into the USB interface; find out “General Setting”→“Version Upgrading” →“System Upgrading”, and click local upgrading, then the system will automatically detect the upgrading package and install it for upgrading.

- Remarks: During upgrading, please do not remove the disc or cut off the power supply.

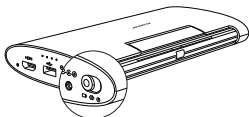

11 Switching of Video Signal Source

When outside signal source is input into JMGO equipment through HDMI interface, keep pressing the menu button of the remote control to call out the shortcut menu or find out the “signal source menu” on the desktop for entering into the signal source setting interface. At this interface, you can select the required video signal source, and as soon as the signal source is switched, JMGO equipment connects with the outside video signal source and projects the video content.

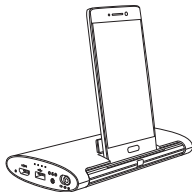

12 Power Bank

This product can be used as a power bank intended for power supply of mobile equipment. There is a function trigger on the machine body, through which power bank/projection is switched. Under power-off mode, switch to power bank mode and connect USB interface of the projector through data line to charge the equipment.

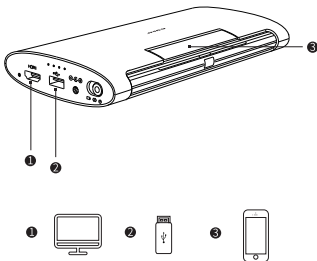

13 Mobile Phone display

A mobile phone can be connected to the projector through direct-plug-in base, that is, to play videos and audios in the mobile phone on the projector. IPHONE can directly be connected to the projector so as to share the screen and Android mobile phones need to download and install the APP.

- Remarks: The magnetic interface on the projector base can be taken down and replaced. This product is provided with three (Micro USB, Type-c and IPHONE flash interface) standard mobile phone interfaces, which can be replaced arbitrarily so as to adapt to different mobile phones.

14 Peripheral Connection

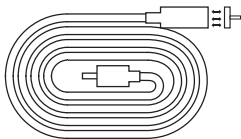

15 Download and Installation of “JMGO Control”

- This product supports mobile phone control. Scan the QR code below and you can download and install the “JMGO Control” application through which you can use mobile phone to easily control and operate the equipment.
- JMGO Control supports both Android equipment and IOS equipment.

16 Usage of Magnetic Data Line

Magnetic sucker and magnetic data line are connected by magnetism.

17 Instruction of Environment-friendly Use

The service life label indicates that the environment-friendly service life of this product is 10 years, that is, trace poisonous and harmful substances or elements contained in this product will neither leak or mutate and cause serious environmental pollution and nor cause severe damage to human body and properties under normal use within 10 years.

Name and content of trace poisonous and harmful substances or elements contained in all parts of this product:

Part name	Poisonous and harmful substances or elements					
	Lead	Mercury	Cadmium	Hexavalent chrome	Polybrominated biphenyls	Polybrominated diphenyl ethers
	Pb	Hg	Cd	(Cr(VI))	PBB	PBDE
Host	×	○	○	○	○	○
Remote control	×	○	○	○	○	○
Cable	○	○	○	○	○	○
Adapter	×	○	○	○	○	○
Packing material	○	○	○	○	○	○
O: It means that the content of such poisonous and harmful substances in all homogeneous materials of this part is less than the limited quantity set forth in GB/T 26572-2011						
X: It means that the content of such poisonous and harmful substances in certain homogenous material of this part is more than the limited quantity set forth in GB/T 26572-2011. Moreover, now, there is no mature alternative solution in the industry, but it complies with the environmental protection requirements of RoHS directive.						

FCC WARNING

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or

more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

To maintain compliance with FCC's RF Exposure guidelines, This equipment should be installed and operated with minimum distance between 20cm the radiator your body: Use only the supplied antenna.

FCC ID: SMC-M6

Manufacturer's Name: SHENZHEN HOLATEK Co.,LTD

Trade Mark: JMGO

Model number: M6

Operating Temperature: -10° C to 40° C

This device was tested for typical body-worn operations. To comply with RF exposure requirements, a minimum separation distance of 0cm must be maintained between the user's body and the handset, including the antenna. Third-party belt-clips, holsters, and similar accessories used by this device should not contain any metallic components.

Body-worn accessories that do not meet these requirements may not comply with RF exposure requirements and should be avoided. Use only the supplied or an approved antenna.

This device in compliance with the essential requirements and other relevant provisions of Directive 2014/53/EU. All essential radio test suites have been carried out.

1. CAUTION : RISK OF EXPLOSION IF BATTERY IS REPLACED BY AN INCORRECT TYPE. DISPOSE OF USED BATTERIES ACCORDING TO THE INSTRUCTIONS

2. The device complies with RF specifications when the device used at 5cm from your body
