

November 22, 2017

To Whom it May Concern,

Effective November 1, 2017, IntelliGuard became the dba (doing business as) of MEPS Real-Time, Inc. The change in branding supports our distinctiveness as the only enterprise platform to support a broad category of pharmaceutical inventory and other critical supplies in the healthcare market.

Our core business and technologies have not changed and we are still the leading innovator in Radio Frequency Identification (RFID) solutions that offer modular and scalable systems the support nearly every area of the supply change distribution process – from hospital and health systems pharmacy systems to manufacturer and distributor supply chains.

Additional information may be found on our website <http://IG.Solutions>.

Sincerely,

Dave Sweeney, Vice President of Product and Services Delivery

IntelliGuard® Intelligent Inventory Solutions
