

Correspondence Summary Q & A

January 4, 2006

SUBJECT: HAWKING TECHNOLOGIES INC. - FCC ID: SOY-HMB1

1. Question: Test report: please explain the differences between models: HMB1, HMB1-CA, HMB1-EU

Ans: There is no difference for these model names.

2. Question: Please include an explanation in the Operational description or test report concerning the MIMO feature.

Ans: Please see the revised operational description attached. Since this application is for the whole system including the booster and the router. So, most of the description is for the router because booster is just an amplifier.

3. Question: Please specify if the intent of the applicant is to market this device separately or together with the access point/router tested and documented in this filing.

Ans: Separately. So, in the label sample, you will see the restriction that this booster can only be operated with specific router.
