1 SCOPE

This document describes key hardware aspects of the Laird Summit SOM 8M Plus wireless SOM (system-on-module) which is based on the NXP 88W8997 WiFi/BT combo radio and i.MX8M Plus processor family. Data in this document is drawn from several sources and includes information found in the NXP i.MX8M Plus, 88W8997.

Note: Information in this document is subject to change. Please contact Laird to obtain the most update version of this document.

2 INTRODUCTION

Summit SOM 8M Plus is an integrated platform solution with **Dual/Quad** Cortex®-A53 processors operation up to 1.6 GHz and pre-certified dual-band Wi-Fi (2X2 MIMO, 802.11a/b/g/n/ac) with Bluetooth 5.3 dual mode connectivity.

Dual/Quad Arm® Cortex®-A53 processor integrated with an NPU of 2.3 TOPS that greatly accelerates machine learning inference. The vision engine is composed of two camera inputs and an HDR-capable Image Signal Processor (ISP) capable of 375 MPixels/s. The advanced multimedia capabilities include 1080p60 video encode and decode H.265 and H.264. A 3D and 2D graphic acceleration supporting 1 GPixel/s, OpenVG 1.1, Open GL ES3.1, Vulkan, and Open CL 1.2 FP. Multiple audio and microphone interfaces for Immersive Audio and Voice systems.

A microcontroller is enabled by Arm® Cortex®-M7 running at 800 MHz for customer applications to offload the Cortex®-A53 processor for real time and low power operation. A variety of robust control networks for industrial application are possible via CAN-FD interfaces and dual Gb Ethernet.

Summit SOM 8M Plus is pre-calibrated and integrates the complete transmit/receive RF paths including diplexer, switches, reference crystal oscillator and power manage units (PMU). Two RF connectors (U. FL) on the module provide the most flexibility of antenna select and installation to get best antenna performance. Several high-performance antennas are granted with Summit SOM 8M Plus. Detail antenna list is shown in certification section.

The module supports IEEE 802.11 ac (wave 2) 2X2 receive MIMO spatial stream multiplexing with data rates up to MCS9 (866.7 Mbps). In addition, its dual 802.11 and Bluetooth radio includes full digital MAC and baseband engines that handle all 802.11 CCK/OFDM® 2.4/5GHz, and Bluetooth 5.3 (Basic Rate, Enhanced Data Rate and Bluetooth Low Energy) baseband and protocol processing. Internal Wi-Fi and BT coexistence scheme provides optimized throughput when Wi-Fi and BT working simultaneously.

Hardware development kit (DVK) and a software developer's kit (SDK) with Application Programming Interfaces (API) providing the reference development environment of custom software applications for their application.

The Summit SOM 8M Plus wireless SOM has two product SKUs which have different processors and memory volume. Please check Laird Sales/FAE for further information. Order information is listed in Table 1.

3 SUMMIT SOM 8M PLUS FEATURES SUMMARY

The Summit SOM 8M plus module is based on i.MX8M plus from NXP which offers a variety of interfaces and different memory configuration. Most of these interfaces are multiplexed and not able to be used simultaneously. Key features of Summit SOM 8M plus are described in Table 2.

Table 2: Key Features of Summit SOM 8M Plus

Feature	Description
CPU	■ Dual/Quad Cortex®-A53 processors operation up to 1.6 GHz ■ 32 KB L1 Instruction Cache ■ 32 KB L1 Data Cache ■ 512 KB unified L2 cache ■ Cortex®-M7 core platform operating up to 800 MHz ■ 32 KB L1 Instruction Cache ■ 32 KB L1 Data Cache ■ 256 KB tightly coupled memory (TCM)
Image Sensor Processor (ISP)	■ 375 Mpixel/s HDR ISP supporting configurations, such as 12MP@30fps, 4kp45, or 2x 1080p80
Memory interface	■ On module: 32-bits LPDDR4 with inline ECC (size, please referred to table 1) ■ On module: 8-bits eMMC 5.1 with SDR104 speed. (Size, please referred to table 1) ■ eMMC 5.1Flash ■ SPI ■ FlexSPI Flash with support for XIP (for Cortex®-M7 in low-power mode) and support for either one Octal SPI, or parallel read mode of two identical Quad SPI FLASH devices. ■
Graphic Processing Unit	■ GC7000UL with OpenCL and Vulkan support ■ 2 shaders ■ 166 million triangles/sec ■ 1.0 giga pixel/sec ■ 16 GFLOPs 32-bit ■ Supports OpenGL ES 1.1, 2.0, 3.0, OpenCL 1.2, Vulkan ■ Core clock frequency of 1000 MHz ■ Shader clock frequency of 1000 MHz ■ GC520L for 2D acceleration ■ Render target compatibility between 3D and 2D GPU (super tile status buffer)
Video Processing Unit	Video Decode ■ 1080p60 HEVC/H.265 Main, Main 10 (up to level 5.1) ■ 1080p60 VP9 Profile 0, 2 ■ 1080p60 VP8 ■ 1080p60 AVC/H.264 Baseline, Main, High decoder Video Encode ■ 1080p60 AVC/H.264 encoder

Feature	Description
	1080p60 HEVC/H.265 encoder
Neural Processing Unit (NPU)	2.3 TOP/s Neural Network performance - Keywords detect, noise reduction, beamforming - Speech recognition (i.e., Deep Speech 2) - Image recognition (i.e., ResNet-50)
HDMI 2.0a Tx	HDMI 2.0a Tx supporting one display - Resolutions of 720 x 480p60, 1280 x 720p60, 1920 x 1080p60, 1920 x 1080p120, 3840 x 2160p30 - Pixel clock up to 297 MHz Audio support 32-channel audio output support 1 SPDIF audio eARC input support
LCDIF Display Controller	Support up to 1920x1200p60 display per LCDIF if no more than 2 instances used simultaneously, or 2x 1080p60 + 1x 4kp30 on HDMI if all 3 instances used simultaneously. - One LCDIF drives MIPI DSI, up to UWHD and WUXGA - One LCDIF drives LVDS Tx, up to 1920x1080p60 - One LCDIF drives HDMI Tx, up to 4kp30
MIPI Interface	4-lane MIPI DSI interface Two instances of 4-lane MIPI CSI interface and HDR ISP 2x ISP supporting 375 Mpixel/s aggregate performance and up to 3-exposure HDR processing. - When one camera is used, support up to 12MP@30fps or 4kp45 - When two cameras are used, each supports up to 1080p80 - Maximum resolution limited to resolutions achievable with a 250 MHz pixel clock and active pixel rate of 200 Mpixel/s with 24-bit RGB. This includes resolutions such as: 1080 p60 - WUXGA (1920X1200) at 60 Hz 1920x1440 at 60 Hz - WHD (2560X1080) at 60 Hz - MIPI DSI: WQHD (2560x1440) can be supported by reduced blanking mode
Audio	- Cadence® Tensilica® HiFi 4 DSP, operating up to 800 MHz - SPDIF input and output, including a raw capture input mode - Six external synchronous audio interface (SAI) modules supporting I2S, AC97, TDM, codec/DSP, and DSD interfaces, comprising one SAI with 8 TX and 8 RX lanes, one SAI with 4 TX and 4 RX lanes, two SAI with 2 TX and 2 RX lanes, and two SAI with 1 TX and 1RX lane. - All ports support 49.152 MHz BCLK. - ASRC supports processing 32 audio channels, 4 context groups, 8 kHz to 384 kHz sample rate, and 1/16 to 8x sample rate conversion ratio. - eARC/ARC 8-channel PDM mic input
Connectivity	- Two USB 3.0 Type C controllers with integrated PHY (also supported USB 2.0) interfaces - Two Ultra Secure Digital Host Controller (uSDHC) interfaces - Two Ethernet controllers (both capable of simultaneous operation) - Two Controller Area Network (FlexCAN) modules, each optionally supporting flexible data-rate (FD) Note: Legacy CAN mode supports both Mailbox (MB) and RX FIFO (with DMA support) operation. Flexible Data (FD) mode supports MB operation only. There is no enhanced RX FIFO or DMA support in FD mode. - Four Universal Asynchronous Receiver/Transmitter (UART) modules - Six I2C modules - Three SPI modules

Feature	Description
Security	■ Resource Domain Controller (RDC) ■ Arm® TrustZone® (TZ) architecture ■ On-chip RAM (OCRAM) secure region protection using OCRAM controller ■ High Assurance Boot (HAB) ■ Cryptographic Acceleration and Assurance Module (CAAM) ■ Secure Non-Volatile Storage (SNVS) ■ Secure JTAG Controller (SJC)
Debug Interface	■ Secure JTAG Controller (SJC) ■ Two Debug UART port for Dual/Quad Cortex®-A53 processors and Cortex®-M7.
RF output	■ Two RF output with U. FL connectors provide flexible of external antenna selection for optimize performance. ■ Main antenna: Support both WiFi and BT ■ Aux Antenna: Support WiFi only.
MAC address	■ MAC address etch on the shielding cover is the first MA address for WiFi ■ The coming 3 MAC address are reserved for Wifi. ■ The BT MAC address is the etched number + 3

4 BLOCK DIAGRAM

The figure below shows the block diagram of Summit SOM 8M Plus which contains the NXP i.MX 8MPlus processor, PMIC (PCA9450CHN and 88PG823) and the WiFi SOC 88W8997.

Figure 3: Block diagram of Summit SOM 8M Plus

Detailed connection between 88W8997 and I.MX8M plus are detailed in below table.

	88W8997	i.MX8M Plus
SDIO	SD_CLK/SD_CMD/SD_DATA0-3	SD1_CLK/SD1_CMD/SD1_DATA0-3
PCIe	PCIE_RCLK_P/PCIE_RCLK_N/PCIE_TX_P/PCIE_TX_N/ PCIE_RX_P/PCIE_RX_N/PCIE_WAKEn/PCIE_CLKREQn/ PCIE_W_DISABLEn/PCIE_PERSTn	PCIE_REF_PAD_CLK_P/PCIE_REF_PAD_CLK_N/PCIE_RXN_P/ PCIE_RXN_N/PCIE_TXN_P/PCIE_TXN_N/I2C4_SDA/I2C4_SCL/ SD1_DATA5/SD1_DATA4
UART	UART_SOUT/UART_SIN/UART_CTSn/UART_RTSn	ECSPI1_SCLK/ECSPI1_MOSI/ECSPI1_MISO/ECSPI1_SS0
WoW	GPIO[0]	NAND_DQS
WoBT	GPIO[3]	SD1_STROBE
WiFi BS	CONFIG_HOST[0]	SD1_DATA6
WiFi BS	CONFIG_HOST[1]	SD1_DATA7

Note: CONFIG_HOST[2] is 49.9K to ground.

CONFIG_HOST[2-0]="0,0,0" for SDIO (WiFi) and UART (BT); CONFIG_HOST[2-0]="0,1,10" for PCIe (WiFi) and UART (BT).

5 DC POWER TREE

The Summit SOM 8M Plus requires a primary 5V power supply (VSYS_5V) input. This supply is the main power domain to the on-module NXP PCA9450CHN power management IC (PMIC), which generates all required supply voltages for the module components. The PMIC has 32.768KHz crystal oscillator and buffer build-in which generate the real-time clock (RTC) for the NXP processor and WiFi radio.

The PMIC generates the following power domains that are available on the SOM module pads:

- VDD_3V3
- VSD_3V3

Figure 2: DC power tree of Summit SOM 8M Plus

Power Modes Diagram

NXP PCA9450CHN has eight power modes: OFF, READY, SNVS, RUN, STANDBY, PWRDN, PWRUP and FAULT_SD. Below figure shows the state transition diagram showing the conditions to enter and exit each state.

Figure 3: State transition diagram for PMIC

- ◆ **OFF mode:**
PMIC will enter OFF mode from any state when the main power source VSYS_5V falls below V_{sys_POR} threshold (2.2 to 2.6V; typ.=2.4V). All regulators are OFF and all registers get reset in this mode.
- ◆ **READY Mode:**
PMIC enters READY mode when VSYS_5V is higher than V_{sys_POR} . The internal LDO VINT is enabled and loads the MTP data to registers. Once the MTP data loading is done, it is ready to transition to SNVS mode.

- ◆ **SNVS Mode:**
PMIC will enter SNVS (Secure Non-Volatile Storage mode) when VSYS_5V exceeds the V_{sys_UVLO} threshold. LDO1 is powered up and the 32.778KHz buffer starts running. RTC_RESET_B is pulled high after both LDO1 and LDO2 voltage come up.
Note: PMIC_ON_REQ input is masked until RTC_RESET_B is released. PMIC will start power up sequence if PMIC_ON_REQ is asserted high in this mode.
- ◆ **PWRUP Mode:**
After RTC_RESET_B is released in SNVS mode, it starts power up with pre-defined sequence with PMIC_ON_REQ is asserted high.

During PWRUP mode, PMIC_STBY_REQ signal is masked until POR_B is released. The PWRUP mode ends up releasing POR_B and the PMIC is transitioned to RUN mode.
- ◆ **PWRDN Mode:**
When PMIC_ON_REQ is low in RUN or STANDBY mode, PMIC enters PWRDN mode, where it starts with pulling down POR_B. and then turning off each power rail and is transitioned to SNVS mode.
- ◆ **RUN Mode:**
PMIC operates in RUN mode when PMIC_ON_REQ is driven high and PMIC_STBY_REQ is driven low. When PMIC_STBY_REQ is asserted high in this mode, it is transitioned to STANDBY mode. PMIC_ON_REQ is asserted low, it moves to PWRDN mode.
- ◆ **STANDBY Mode:**
PMIC is transitioned to STANDBY mode from RUN mode when both PMIC_ON_REQ and PMIC_STBY_REQ are driven low. If PMIC_ON_REQ is asserted low, then it is transitioned to PWRDN mode. If PMIC_STBY_REQ is driven low, it is transitioned to RUN mode.

Power Mode	VSYS_5V	PMIC_ON_REQ	PMIC_STBY_REQ
OFF	$VSYS_5V < V_{SYS_POR}$	X	X
READY	$VSYS_5V > V_{SYS_POR}$	X	X
SNVS	$VSYS_5V > V_{SYS_UVLO}$	LOW	X
STANDBY	$VSYS_5V > V_{SYS_UVLO}$	HIGH	HIGH
RUN	$VSYS_5V > V_{SYS_UVLO}$	HIGH	LOW

- ◆ **FAULT_SD Mode:**
PCA9450CHN has three kinds of Fault sources.
 - **Thermal shutdown:** Transition to SNVS mode or READY mode after Fault_SD mode.
When junction temperature reach to 150°C, it enters FAULT_SD mode after 120 μ s where regulators are tuned off simultaneously. It stays at FAULT_SD mode until the junction temperature fall below 150°C, then move to READY state if any of LDO1 and LDO2 is fault is triggered. And it will move to SNVS mode if either LDO1 or LDO2 fault is triggered.
 - **Voltage regulator fault during power up:** Transition to READY mode after FAULT_SD mode.
Any POK of voltage regulator doesn't come up within 10ms after regulator is enabled during power up sequence, it stops power-up sequence and then moves into FAULT_SD mode where all regulators are turned off.
 - **Voltage regulator fault in STBY and RUN MODE:** Move to FAULT_SD mode in 100ms after fault is detected.
Transition to SNVS mode or READY mode after FAULT_SD mode.

6 BOOTSTRAP

Laird Summit SOM 8M Plus module can be configured to boot from a different interface by selecting the BOOT_Mode [3-0]. These bits are latched externally during boot-up.

BOOT_MODE3	BOOT_MODE2	BOOT_MODE1	BOOT_MODE0	BOOT MODE
0	0	0	0	Boot from Internal Fuses
0	0	0	1	USB Serial Download
0	0	1	0	uSDHC3 (eMMC boot only, SD3 8-bit) Default.
0	0	1	1	uSDHC2 (SD boot, SD2)
0	1	0	0	NAND 8-bit single device 256 pages.
0	1	0	1	NAND 8-bit single device 512 pages
0	1	1	0	QSPI 3B Read
0	1	1	1	QSPI Hyperflash 3.3V
1	0	0	0	ECSPI Boot
1	0	0	1	Reserved
1	0	1	0	Reserved
1	0	1	1	Reserved
1	1	0	0	Reserved (Boot on I2C connected to BOOT PIN[3:2])
1	1	0	1	Reserved
1	1	1	0	Infinite Loop Mode
1	1	1	1	Test Mode

Caution:

BOOT_MODE0, BOOT_MODE1, BOOT_MODE2, BOOT_MODE3, JTAG_MOD and POR_B must be pulled to “111111” for i.MX8M Plus to enter Boundary Scan Mode.

7 WIRELESS INTERFACE

The Summit SOM 8M Plus module supports IEEE 802.11 a/b/g/n/ac WLAN wave-2, 2x2 MU-MIMO combo solution with full support for Bluetooth 5.3 including support for features like 2Mbps LE and direction-finding using Angle of Arrival (AOA) and Angle of Departure (AOD). The following sections details the specifications for the wireless interface available on this SOM module.

WiFi on the Summit SOM 8M Plus module supports 20/40MHz bandwidth when operated at 2.4GHz and 20/40/80 MHz bandwidth when operated at 5GHz band.

Bluetooth supports both basic rate, enhanced data rate and Bluetooth low energy.

- WiFi and Bluetooth Modulation and data rate:**
2.4GHz: 11b, 11g, 11n (HT20, HT40).
5GHz: 11a, 11n (HT20, HT40), 11 ac (HT20, HT40, HT80)

WiFi Mode	Modulation	Coding	Rate
802.11b	DBPSK	-	1
	DQPSK	-	2
	CCK	-	5.5
	CCK	-	11
802.11ag	BPSK	1/2	6

8 ELECTRICAL CHARACTERISTIC AND POWER CONSUMPTION

8.1 Absolute Maximum Ratings

Table 2 2 summarizes the absolute maximum ratings and Table 3 lists the recommended operating conditions for the Summit SOM 8M Plus product series. Absolute maximum ratings are those values beyond which damage to the device can occur. Functional operation under these conditions, or at any other condition beyond those indicated in the operational sections of this document, is not recommended.

Note: Maximum rating for signals follows the supply domain of the signals.

Table 2: Absolute maximum ratings

Symbol (Domain)	Parameter	Min.	Max	Unit
VSYS_5V	Input voltage for the SOM	-0.5	+6.0	V
I/O Input/output voltage range	Any I/O pin referred to VDD_1V8; VDDA_1V8; WIFI_1V8; NVCC_SNVS_1V8	-0.3	+2.1	V
I/O Input/output voltage range	Any I/O pin referred to VDD_3V3; VSD_3V3; NVCC_SD2	-0.3	+3.6	V
T _{STORAGE}	Storage Temperature Range	-40	+125	°C
ANT0; ANT1	Maximum RF input (reference to 50-Ω input)	NA	+10	dBm
ESD	Electrostatic discharge tolerance	-2000	+2000	V

8.2 Recommended Operating Conditions

Table 3: Recommended Operating Conditions

Symbol (Domain)	Parameter	Min	Typ	Max	Unit
VSYS_5V	Input voltage for the SOM	2.7	5.0	5.5	V
I/O Input/output voltage range	Any I/O pin referred to VDD_1V8; VDDA_1V8; WIFI_1V8; NVCC_SNV5_1V8	1.71	1.8	1.89	V
I/O Input/output voltage range	Any I/O pin referred to VDD_3V3; VSD_3V3; NVCC_SD2	3.0	3.3	3.6	V
T-ambient	Operating Ambient temperature	-40	25	85	°C

Note:

The operating ambient temperature ratings are highly dependent on the design-case, such as the enclosure design, system design, different processor variant, GPU/VPU activity, and peripherals used.

Running over 70° C ambient temperature typically requires the implementation of thermal management strategies such as passive (heatsink/-spreader). Please contact Laird if you need information and guidance for thermal management.

8.3 DC current consumption

Below table shows the current consumption of continuous transmit mode

Mode	Rate	CPU loading	TX power	Current		
				Min.	Avg.	Max.
11b	1Mbps	100%	20dBm	1.17	1.25	1.4
		50%		1.01	1.15	1.41

Several power saving modes are listed in the table below.

Mode	Description	Current (Avg)
Power Saving mode	CPU is on, Stay on WiFi connection only.	431mA
RAM suspend mode	CPU is on, memory and wireless connection are off.	7.7mA
Linux graceful power down mode	All circuits are off. Only the NVCC_SNVS_1V8 PMU is alive and ONOFF pin accessible for turn on the SOM.	154uA

9 MODULE PIN OUT AND PIN-MUX TABLE

Table 4 list the pin multiplexing (PIN-MUX) of the Summit SOM 8M Plus. Most of the pin name on the SOM are same as the pin name of NXP processor it connected. The "Pin Number" column show the relationship of the SOM pin number to the NXP processor pin number.

PO = Power Output, PI = Power Input, DI = Digital Input, DO = Digital Output, DIO = Bi-directional Digital Port, GND = Ground

NXP process has configurable internal Pull-up (PU) and pull-down (PD) resistor which values are list in below. During reset condition, the PU and PD state are pre-defined and not able to be changed.

Parameter	Conditions	Min	Typ	Max	Unit
Pull-up (PU) resistor	VDD=1.65 to 1.95V	12	22	49	k Ω
Pull-down (PD) resistor	Temp=0 to 95°C	13	23	48	k Ω
Pull-up (PU) resistor	VDD=3.0 to 3.6V	18	37	72	k Ω
Pull-down (PD) resistor	Temp=0 to 95°C	24	43	87	k Ω

※ The pin configuration Tools for i.MX is a suite of evaluation and configuration tools that help users from initial evaluation to production software development. Users can download it from NXP website: https://www.nxp.com/design/designs/config-tools-for-i-mx-applications-processors:CONFIG-TOOLS-IMX?tab=Design_Tools_Tab

10 MECHANICAL AND PCB FOOTPRINT SPECIFICATION

Module dimensions of Summit SOM 8M Plus is 47 x 40 x 24.6 mm. Detail drawings are shown in below Figure.

Note: There are some components located at center of module bottom (see below picture). Host PCB requires routing out that area. Please reference the PCB footprint for detail dimension from our website.

Figure 6: Mechanical drawing – Summit SOM 8M Plus module

The heat-sink kit for thermal management is detailed in below figure. It contains a thermal pad, heat sink and two push pins. User can install it after the SOM assemble on the host platform. When a system operating at ambient temperature higher than 70 °C, a heat sink like this is needed to maintain function and reliability.

- Notes:
- <Heat Sink>
 1. Material: Aluminum alloy
 2. Finish: Sandblasting and Black Anodized
 - <Thermal Pad>
 1. Recommended/approved Supplier: Zitek, Supplier P/N: TIF140-30-05S
 2. Size: 1mmT x 39.50mm x 41.50mm
 - <Push Pin>
 1. Recommended/approved Supplier: Pingood enterprise co. Ltd, Supplier P/N: MB-17C

Figure 7: Mechanical drawing – Summit SOM 8M Plus module

In below figure, it details the recommend PCB footprint implement on host PCB. Be aware of the keep out and routing area at center of the SOM module. Also, keep the two location holes (and connect to ground) for heat-sink kit as you can that allow you to apply heat sink when dealing with thermal management issue.

Figure 8: Recommend PCB footprint for Host PCB

11 HANDLING AND ASSEMBLY INSTRUCTIONS

11.1 Recommended Storage, Handling, Baking, and Reflow Profile

1. Required Storage Conditions:

■ Prior to Opening the Dry Packing

The following are required storage conditions prior to opening the dry packing:

Normal temperature: 5~40°C

Normal humidity: 80% (Relative humidity) or less

Storage period: One year or less

■ After Opening the Dry Packing

The following are required storage conditions after opening the dry packing (to prevent moisture absorption):

Storage conditions for one-time soldering:

- Temperature: 5-25°C
- Humidity: 60% or less
- Period: 72 hours or less after opening

Storage conditions for two-time soldering

Storage conditions following opening and prior to performing the 1st reflow:

- Temperature: 5-25°C
- Humidity: 60% or less
- Period: A hours or less after opening

Storage conditions following completion of the 1st reflow and prior to performing the 2nd reflow

- Temperature: 5-25°C
- Humidity: 60% or less
- Period: B hours or less after completion of the 1st reflow

Note: Should keep A+B within 72 hours.

■ Temporary Storage Requirements after Opening

The following are temporary storage requirements after opening:

Only re-store the devices once prior to soldering.

Use a dry box or place desiccant (with a blue humidity indicator) with the devices and perform dry packing again using vacuumed heat-sealing.

The following indicates the required storage period, temperature, and humidity for this temporary storage:

Note: X1+X2 – Refer to after Opening the Dry Packing storage requirements. Keep is X1+X2 within 72 hours.

Note: Y – Keep within two weeks or less.

2. Baking Conditions:

Baking conditions and processes for the module follow the J-STD-033 standard which includes the following:

The calculated shelf life in a sealed bag is 12 months at <40°C and <80% relative humidity.

Once the packaging is opened, the SOM must be mounted (per MSL4/Moisture Sensitivity Level 4) within 72 hours at <30°C and <60% relative humidity.

If the SOM is not mounted within 72 hours or if, when the Dry pack is opened, the humidity indicator card displays >10% humidity, then the product must be baked for 48 hours at 125°C (±5°C).

3. Reflow profile:

Convection reflow or IR/Convection reflow (one-time soldering or two-time soldering in air or nitrogen environment)

Measuring point – IC package surface

Temperature profile:

Figure 9: Recommend reflow profile

- Ramp-up: $40\text{--}130^{\circ}\text{C}$ less than 2.5°C/sec .
- Pre-heat: $130\text{--}180^{\circ}\text{C}$ 60-120 seconds, 180°C MAX .
- Ramp-up: $189\text{--}220^{\circ}\text{C}$, less than 3°C/sec .
- Peak temperature: $225\text{--}250^{\circ}\text{C}$, 30-50seconds, 250°C Max .
- Ramp-down: Less than 3°C/sec .

11.2 Others

- Stencil thickness: $\geq 0.125\text{mm}$ with one to one of pad dimension opening. (Reference the PCB footprint design)
- The coplanarity of the Summit SOM 8M Plus is $<0.1\text{mm}$ on the PCB button. It is recommended to have supported carrier fixtures during reflow process to minimize the potential bow on the host PCB which causing poor or insufficient solder.
- The Summit SOM 8M Plus only allows one-time reflow process.

12 REGULATORY

12.1 Regulatory IDs Summary

Model	US/FCC	Canada/IC	Japan
Summit SOM 8M Plus	SQG-SOM8MPLUS	3147A-SOM8MPLUS	201-210466

12.2 Certified Antennas

Model	Type	Connector	Peak Gain
Laird/NanoBlade-IP04 (Part# CAF94505)	PCB Dipole	IPEX U.FL	2 dBi (2.4-2.5 GHz), 3.9 dBi (5.15-5.35 GHz), 4 dBi (5.6 GHz)
Laird/Mini NanoBlade Flex (Part# MAF95310)	PCB Dipole	IPEX U.FL	2.8 dBi (2.4-2.5 GHz), 3.4 dBi (4.9-5.875 GHz)
Laird/Flex MIMO (Part# EFD2455A3S-10MHF1)	PCB Dipole	IPEX U.FL	2dBi (2.4-2.48GHz), 3dBi (4.9-5.9GHz)
Laird/FlexPIFA (Part# 001-0016)	PIFA	IPEX U.FL	2.5dBi (2.4-2.48GHz), 3dBi (4.9-5.9GHz)
Laird/2.4GHz/5GHz Dipole Antenna (Part# 001-0009)	Dipole	RP-SMA Male	2dBi (2.4-2.5GHz), 2dBi (5.15-5.85GHz)

13 FCC AND IC REGULATORY

Model	US/FCC	CANADA/IC
Summit SOM 8M Plus	SQG-SOM8MPLUS	3147A-SOM8MPLUS

The LWB5-Plus series wireless module is designed to pass certification with the antenna listed below. The required antenna impedance is 50 ohms.

Model	Type	Connector	Peak Gain
Laird/NanoBlade-IP04 (Part# CAF94505)	PCB Dipole	IPEX U.FL	2 dBi (2.4-2.5 GHz), 3.9 dBi (5.15-5.35 GHz), 4 dBi (5.6 GHz)
Laird/Mini NanoBlade Flex (Part# MAF95310)	PCB Dipole	IPEX U.FL	2.8 dBi (2.4-2.5 GHz), 3.4 dBi (4.9-5.875 GHz)
Laird/Flex MIMO (Part# EFD2455A3S-10MHF1)	PCB Dipole	IPEX U.FL	2dBi (2.4-2.48GHz), 3dBi (4.9-5.9GHz)
Laird/FlexPIFA (Part# 001-0016)	PIFA	IPEX U.FL	2.5dBi (2.4-2.48GHz), 3dBi (4.9-5.9GHz)
Laird/2.4GHz/5GHz Dipole Antenna (Part# 001-0009)	Dipole	RP-SMA Male	2dBi (2.4-2.5GHz), 2dBi (5.15-5.85GHz)

13.1 FCC

Federal Communication Commission Interference Statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in an installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

FCC Caution:

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate this equipment.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Important Note

Radiation Exposure Statement

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator and your body.

This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.

Country Code selection feature to be disabled for products marketed to the US/Canada.

This device is intended only for OEM integrators under the following conditions:

1. The antenna must be installed such that 20 cm is maintained between the antenna and users, and
2. The transmitter module may not be co-located with any other transmitter or antenna,
3. For all products market in US, OEM must limit the operation channels in CH1 to CH11 for 2.4G band by supplied firmware programming tool. OEM shall not supply any tool or info to the end-user regarding Regulatory Domain change.

If the three conditions above are met, further **transmitter** testing is not required. However, the OEM integrator is still responsible for testing their end-product for any additional compliance requirements required with this module installed.

Important Note

If these conditions **cannot be met** (for example certain laptop configurations or co-location with another transmitter), then the FCC authorization is no longer considered valid, and the FCC ID **cannot** be used on the final product. In these circumstances, the OEM integrator is responsible for re-evaluating the end product (including the transmitter) and obtaining a separate FCC authorization.

End Product Labeling

This transmitter module is authorized only for use in devices where the antenna may be installed such that 20 cm may be maintained between the antenna and users. The end product must be labelled in a visible area with the following: **Contains FCC ID: SQG-SOM8MPLUS**

Manual Information to the End User

The OEM integrator must be aware not to provide information to the end user regarding how to install or remove this RF module in the user's manual of the end product which integrates this module.

The end user manual shall include all required regulatory information/warning as shown in this manual.

Applicable FCC rules to module

FCC Part 15.247

Summarize the specific operational use conditions

This device is intended only for OEM integrators under the following conditions:

- 1) The transmitter module may not be co-located with any other transmitter or antenna

As long as 1 condition above are met, further transmitter test will not be required. However, the OEM integrator is still responsible for testing their end-product for any additional compliance requirements required with this module installed.

IMPORTANT NOTE: In the event that these conditions can not be met (for example certain laptop configurations or co-location with another transmitter), then the FCC authorization is no longer considered valid and the FCC ID can not be used on the final product. In these circumstances, the OEM integrator will be responsible for re-evaluating the end product (including the transmitter) and obtaining a separate FCC authorization. The OEM integrator has to be aware not to provide information to the end user regarding how to install or remove this RF module in the user's manual of the end product which integrates this module.

The end user manual shall include all required regulatory information/warning as show in this manual.

Limited module procedures

Not applicable

Trace antenna designs

Not applicable

RF exposure considerations

Co-located issue shall be met as mentioned in "Summarize the specific operational use conditions".

Product manufacturer shall provide below text in end-product manual

"FCC Radiation Exposure Statement:

The product comply with the US portable RF exposure limit set forth for an uncontrolled environment and are safe for intended operation as described in this manual. The further RF exposure reduction can be achieved if the product can be kept as far as possible from the user body or set the device to lower output power if such function is available."

20 cm separation distance and co-located issue shall be met as mentioned in "Summarize the specific operational use conditions".

Product manufacturer shall provide below text in end-product manual

"This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator & your body."

Label and Compliance Information

Product manufacturers must provide, with the finished product, a physical or e-label that states the following:

"Contains FCC ID: SQG-SOM8MPLUS"

Information on Test Modes and Additional Testing Requirements

Test tool: IQExl + IQfact software shall be used to set the module to transmit continuously.

Additional Testing, Part 15 Subpart B Disclaimer

The module is only FCC authorized for the specific rule parts listed on the grant, and that the host product manufacturer is responsible for compliance to any other FCC rules that apply to the host not covered by the modular transmitter grant of certification. The final host product still requires Part 15 Subpart B compliance testing with the modular transmitter installed

13.2 Industry Canada

Industry Canada Statement

This device complies with Industry Canada's license-exempt RSSs. Operation is subject to the following two conditions:

- This device may not cause interference; and
- This device must accept any interference, including interference that may cause undesired operation of the device.

Le présent appareil est conforme aux CNR d'Industrie Canada applicables aux appareils radio exempts de licence. L'exploitation est autorisée aux deux conditions suivantes :

- l'appareil ne doit pas produire de brouillage;
- l'utilisateur de l'appareil doit accepter tout brouillage radioélectrique subi, même si le brouillage est susceptible d'en compromettre le fonctionnement.

This radio transmitter (IC:) has been approved by Industry Canada to operate with the antenna types listed below with the maximum permissible gain indicated. Antenna types not included in this list, having a gain greater than the maximum gain indicated for that type, are strictly prohibited for use with this device.

Le présent émetteur radio (IC:) a été approuvé par Industrie Canada pour fonctionner avec les types d'antenne énumérés ci-dessous et ayant un gain admissible maximal. Les types d'antenne non inclus dans cette liste, et dont le gain est supérieur au gain maximal indiqué, sont strictement interdits pour l'exploitation de l'émetteur.

Antenna Information

Model	Type	Connector	Peak Gain
Laird/NanoBlade-IP04 (Part# CAF94505)	PCB Dipole	IPEX U.FL	2 dBi (2.4-2.5 GHz), 3.9 dBi (5.15-5.35 GHz), 4 dBi (5.6 GHz)
Laird/Mini NanoBlade Flex (Part# MAF95310)	PCB Dipole	IPEX U.FL	2.8 dBi (2.4-2.5 GHz), 3.4 dBi (4.9-5.875 GHz)
Laird/Flex MIMO (Part# EFD2455A3S-10MHF1)	PCB Dipole	IPEX U.FL	2dBi (2.4-2.48GHz), 3dBi (4.9-5.9GHz)
Laird/FlexPIFA (Part# 001-0016)	PIFA	IPEX U.FL	2.5dBi (2.4-2.48GHz), 3dBi (4.9-5.9GHz)
Laird/2.4GHz/5GHz Dipole Antenna (Part# 001-0009)	Dipole	RP-SMA Male	2dBi (2.4-2.5GHz), 2dBi (5.15-5.85GHz)

Caution :

(i) The device for operation in the band 5150–5250 MHz is only for indoor use to reduce the potential for harmful interference to co-channel mobile satellite systems.

(ii) For devices with detachable antenna(s), the maximum antenna gain permitted for devices in the bands 5250-5350 MHz and 5470-5725 MHz shall be such that the equipment still complies with EIRP limit.

(iii) For devices with detachable antenna(s), the maximum antenna gain permitted for devices in the band 5725-5850 MHz shall be such that the equipment still complies with the EIRP limits specified for point-to-point and non-point-to-point operation as appropriate; and

Operations in the 5.25-5.35GHz band are restricted to indoor usage only.

Avertissement :

(i) les dispositifs fonctionnant dans la bande de 5150 à 5250MHz sont réservés uniquement pour une utilisation à l'intérieur afin de réduire les risques de brouillage préjudiciable aux systèmes de satellites mobiles utilisant les mêmes canaux;

(ii) pour les dispositifs munis d'antennes amovibles, le gain maximal d'antenne permis pour les dispositifs utilisant les bandes de 5250 à 5350MHz et de 5470 à 5725 MHz doit être conforme à la limite de la p.i.r.e;

(iii) pour les dispositifs munis d'antennes amovibles, le gain maximal d'antenne permis (pour les dispositifs utilisant la bande de 5725 à 5850 MHz) doit être conforme à la limite de la p.i.r.e. spécifiée pour l'exploitation point à point et l'exploitation non point à point, selon le cas;

Les opérations dans la bande de 5.25-5.35GHz sont limitées à un usage intérieur seulement.

Radiation Exposure Statement

This equipment complies with Canada radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with a minimum distance 20cm between the radiator and your body.

Déclaration d'exposition aux radiations

Cet équipement est conforme Canada limites d'exposition aux radiations dans un environnement non contrôlé. Cet équipement doit être installé et utilisé à distance minimum de 20cm entre le radiateur et votre corps.

This device is intended only for OEM integrators under the following conditions:

- The transmitter module may not be co-located with any other transmitter or antenna.

If the condition above is met, further transmitter test is not required. However, the OEM integrator is still responsible for testing their end-product for any additional compliance requirements required with this module installed.

Cet appareil est conçu uniquement pour les intégrateurs OEM dans les conditions suivantes:

- Le module émetteur peut ne pas être coïmplanté avec un autre émetteur ou antenne.

Tant que les 1 condition ci-dessus sont remplies, des essais supplémentaires sur l'émetteur ne seront pas nécessaires. Toutefois, l'intégrateur OEM est toujours responsable des essais sur son produit final pour toutes exigences de conformité supplémentaires requis pour ce module installé.

Important Note:

If these conditions cannot be met (for example certain laptop configurations or co-location with another transmitter), then the Canada authorization is no longer considered valid, and the IC ID cannot be used on the final product. In these circumstances, the OEM integrator will be responsible for re-evaluating the end product (including the transmitter) and obtaining a separate Canada authorization.

Note Importante:

Dans le cas où ces conditions ne peuvent être satisfaites (par exemple pour certaines configurations d'ordinateur portable ou de certaines co-localisation avec un autre émetteur), l'autorisation du Canada n'est plus considéré comme valide et l'ID IC ne peut pas être utilisé sur le produit final. Dans ces circonstances, l'intégrateur OEM sera chargé de réévaluer le produit final (y compris l'émetteur) et l'obtention d'une autorisation distincte au Canada.

End Product Labeling

The end product must be labeled in a visible area with the following: **Contains IC: 3147A-SOM8MPLUS** .

Plaque signalétique du produit final

Le produit final doit être étiqueté dans un endroit visible avec l'inscription suivante: **Contient des IC: 3147A-SOM8MPLUS.**

Manual Information to the End User

The OEM integrator must be aware not to provide information to the end user regarding how to install or remove this RF module in the user's manual of the end product which integrates this module.

The end user manual shall include all required regulatory information/warning as show in this manual.

Manuel d'information à l'utilisateur final

L'intégrateur OEM doit être conscient de ne pas fournir des informations à l'utilisateur final quant à la façon d'installer ou de supprimer ce module RF dans le manuel de l'utilisateur du produit final qui intègre ce module.

Le manuel de l'utilisateur final doit inclure toutes les informations réglementaires requises et avertissements comme indiqué dans ce manuel.

14 EUROPEAN UNION REGULATORY

The LWB5-Plus series wireless module has been tested for compliance with relevant standards for the EU market. The LWB5-Plus series wireless module was tested with antennas listed below.

Model	Type	Connector	Peak Gain
Laird/NanoBlade-IP04 (Part# CAF94505)	PCB Dipole	IPEX U.FL	2 dBi (2.4-2.5 GHz), 3.9 dBi (5.15-5.35 GHz), 4 dBi (5.6 GHz)
Laird/Mini NanoBlade Flex (Part# MAF95310)	PCB Dipole	IPEX U.FL	2.8 dBi (2.4-2.5 GHz), 3.4 dBi (4.9-5.875 GHz)
Laird/Flex MIMO (Part# EFD2455A3S-10MHF1)	PCB Dipole	IPEX U.FL	2dBi (2.4-2.48GHz), 3dBi (4.9-5.9GHz)
Laird/FlexPIFA (Part# 001-0016)	PIFA	IPEX U.FL	2.5dBi (2.4-2.48GHz), 3dBi (4.9-5.9GHz)
Laird/2.4GHz/5GHz Dipole Antenna (Part# 001-0009)	Dipole	RP-SMA Male	2dBi (2.4-2.5GHz), 2dBi (5.15-5.85GHz)

The OEM should consult with a qualified test house before entering their device into an EU member country to make sure all regulatory requirements have been met for their complete device.

Reference the Declaration of Conformities listed below for a full list of the standards that the modules were tested to. Test reports are available upon request.

14.1 EU Declarations of Conformity

This device complies with the essential requirements of the Radio Equipment directive: 2014/53/EU. The following test methods have been applied to prove presumption of conformity with the essential requirements of the Radio Equipment directive **2014/53/EU**:

Manufacturer:	Laird Connectivity
Products:	Summit SOM 8M series wireless module
EU Directives:	2014/53/EU – Radio Equipment Directive (RED)

Reference standards used for presumption of conformity:

Article Number	Requirement	Reference standard(s)
3.1a	Low voltage equipment safety	EN 60950-1:2006+A11+A1:2010+A12:2011+A2 2013
	RF Exposure	EN 62311:2008 EN 50385:2002
3.1b	Protection requirements with respect to electromagnetic compatibility	EN 301 489-1 v2.2.0 (Draft) EN 301 489-17 v3.2.0 (Draft)
3.2	Means of the efficient use of the radio frequency spectrum	EN 300 328 v2.1.1 (2015-02) EN 301 893 v2.1.0 (Final Draft)

Declaration:

We, Laird, declare under our sole responsibility that the essential radio test suites have been carried out and that the above product to which this declaration relates is in conformity with all the applicable essential requirements of Article 3 of the EU Directive 1999/5/EC, when used for its intended purpose.

Place of Issue:	Laird W66N220 Commerce Court, Cedarburg, WI 53012 USA tel: +1-262-375-4400 fax: +1-262-364-2649
Date of Issue:	May 2017
Name of Authorized Person:	Thomas T Smith, Director of EMC Compliance
Signature of Authorized Person:	

Maximum Output Power for Each Frequency

TBD	20.5 dBm, 5.15-5.25 GHz
	20.5 dBm, 5.25-5.35 GHz
	20.5 dBm, 5.47-5.725 GHz

Software Version for Testing

SW version: P95

The minimum distance between the user and/or any bystander and the radiating structure of the transmitter is 20 cm.

5150 ~ 5350 MHz is limited to indoor used in the following countries:

BE	DK	IE	FR	C Y	LU	NL	PT	S K	UK	NO
BG	DE	E L	HR	L V	HU	AT	RO	FI	LI	TR
CZ	EE	E S	IT	L T	MT	PL	SI	S E	IS	CH

15 ORDERING INFORMATION

Order Model	Description
453-00070R	Module, Summit SOM 8M Plus, Quad Core CPU, 512MB LPDDR4, 8GB eMMC, Tape and Reel
453-00070C	Module, Summit SOM 8M Plus, Quad Core CPU, 512MB LPDDR4, 8GB eMMC, Cut Tape
453-00071R	Module, Summit SOM 8M Plus, Quad Core CPU, 1GB LPDDR4, 8GB eMMC, Tape and Reel
453-00071C	Module, Summit SOM 8M Plus, Quad Core CPU, 1GB LPDDR4, 8GB eMMC, Cut Tape
453-00072R	Module, Summit SOM 8M Plus, Quad Core CPU, 2GB LPDDR4, 16GB eMMC, Tape and Reel
453-00072C	Module, Summit SOM 8M Plus, Quad Core CPU, 2GB LPDDR4, 16GB eMMC, Cut Tape

Order Model	Description
453-00070-K1	Development Kit, Summit SOM 8M Plus, Quad Core CPU, 512MB LPDDR4, 8GB eMMC
453-00071-K1	Development Kit, Summit SOM 8M Plus, Quad Core CPU, 1GB LPDDR4, 8GB eMMC
453-00072-K1	Development Kit, Summit SOM 8M Plus, Quad Core CPU, 2GB LPDDR4, 16GB eMMC
110-00770	Heat Sink, 41.5mm x 39.5mm x 22.54mm, Summit SOM 8M Plus

15.1 General Comments

This is a preliminary datasheet. Please check with Laird for the latest information before commencing a design. If in doubt, ask.

cs Česky [Czech]	[Jméno výrobce] tímto prohlašuje, že tento [typ zařízení] je ve shodě se základními požadavky a dalšími příslušnými ustanoveními směrnice 1999/5/ES.
da Dansk [Danish]	Undertegnede [fabrikantens navn] erklærer herved, at følgende udstyr [udstyrets typebetegnelse] overholder de væsentlige krav og øvrige relevante krav i direktiv 1999/5/EF.
de Deutsch [German]	Hiermit erkläre [Name des Herstellers], dass sich das Gerät [Gerätetyp] in Übereinstimmung mit den grundlegenden Anforderungen und den übrigen einschlägigen Bestimmungen der Richtlinie 1999/5/EG befindet.
et Eesti [Estonian]	Käesolevaga kinnitab [tootja nimi = name of manufacturer] seadme [seadme tüüp = type of equipment] vastavust direktiivi 1999/5/EÜ põhinõuetele ja nimetatud direktiivist tulenevatele teistele asjakohastele sätetele.
en English	Hereby, [name of manufacturer], declares that this [type of equipment] is in compliance with the essential requirements and other relevant provisions of Directive 1999/5/EC.
es Español [Spanish]	Por medio de la presente [nombre del fabricante] declara que el [clase de equipo] cumple con los requisitos esenciales y cualesquiera otras disposiciones aplicables o exigibles de la Directiva 1999/5/CE.
el Ελληνική [Greek]	ΜΕ ΤΗΝ ΠΑΡΟΥΣΑ [name of manufacturer] ΔΗΛΩΝΕΙ ΟΤΙ [type of equipment] ΣΥΜΜΟΡΦΩΝΕΤΑΙ ΠΡΟΣ ΤΙΣ ΟΥΣΙΩΔΕΙΣ ΑΠΑΙΤΗΣΕΙΣ ΚΑΙ ΤΙΣ ΛΟΙΠΕΣ ΣΧΕΤΙΚΕΣ ΔΙΑΤΑΞΕΙΣ ΤΗΣ ΟΔΗΓΙΑΣ 1999/5/ΕΚ.
fr Français [French]	Par la présente [nom du fabricant] déclare que l'appareil [type d'appareil] est conforme aux exigences essentielles et aux autres dispositions pertinentes de la directive 1999/5/CE.
it Italiano [Italian]	Con la presente [nome del costruttore] dichiara che questo [tipo di apparecchio] è conforme ai requisiti essenziali ed alle altre disposizioni pertinenti stabilite dalla direttiva 1999/5/CE.
Latviski [Latvian]	Aršo [name of manufacturer /izgatavojājanosaukums] deklarē, ka [type of equipment / iekārtas tips] atbilst Direktīvas 1999/5/EK būtiskajāmprasībām un citiemar to saistītajiemnoteikumiem.
Lietuvių [Lithuanian]	Šiuo [manufacturer name] deklaruoją, kad šis [equipment type] atitinka esminius reikalavimus ir kitas 1999/5/EB Direktyvos nuostatas.
nl Nederlands [Dutch]	Hierbij verklaart [naam van de fabrikant] dat het toestel [type van toestel] in overeenstemming is met de essentiële eisen en de andere relevante bepalingen van richtlijn 1999/5/EG.
mt Malti [Maltese]	Hawnhekk, [isem tal-manifattur], jiddikjara li dan [il-mudel tal-prodott] jikkonforma mal-htigijiet essenzjali u ma provvedimenti oħrajn rilevanti li hemm fid-Dirrettiva 1999/5/EC.
hu Magyar [Hungarian]	Alulírott, [gyártó neve] nyilatkozom, hogy a [...] típus] megfelel a vonatkozó alapvető követelményeknek és az 1999/5/EC irányelv egyéb előírásainak.
pl Polski [Polish]	Niniejszym [nazwa producenta] oświadczam, że [nazwa wyrobu] jest zgodny z zasadniczymi wymogami oraz pozostałymi stosownymi postanowieniami Dyrektywy 1999/5/EC.
pt Português [Portuguese]	[Nome do fabricante] declara que este [tipo de equipamento] está conforme com os requisitos essenciais e outras disposições da Directiva 1999/5/CE.
sl Slovensko	[Ime proizvajalca] izjavlja, da je ta [tip opreme] v skladu z bistvenimi zahtevami in ostalimi relevantnimi določili

[Slovenian]	direktive 1999/5/ES.
Slovensky [Slovak]	<i>[Menovýrobcu] týmtovyhlasuje, že [typzariadenia] spĺňa základné požiadavky a všetky príslušné ustanovenia Smernice 1999/5/ES.</i>
 Suomi [Finnish]	<i>[Valmistaja = manufacturer] vakuuttaa täten että [type of equipment = laitteen tyyppimerkintä] tyyppinen laite on direktiivin 1999/5/EY oleellisten vaatimusten ja sitä koskevien direktiivin muiden ehtojen mukainen.</i>
 Svenska [Swedish]	<i>Härmed intygar [företag] att denna [utrustningstyp] står i överensstämmelse med de väsentliga egenskapskrav och övriga relevanta bestämmelser som framgår av direktiv 1999/5/EG.</i>

16 BLUETOOTH SIG QUALIFICATION

16.1 Overview

The Summit SOM 8M Plus module is listed on the Bluetooth SIG website as a qualified Controller Subsystem.

Design Name	Owner	Declaration ID	Model Number	Link to listing on the SIG website
Summit SOM 8M Plus	Laird	D057225	453-00070	https://launchstudio.bluetooth.com/ListingDetails/143874
Summit SOM 8M Plus	Laird	D057225	453-00070-K1	https://launchstudio.bluetooth.com/ListingDetails/143874
Summit SOM 8M Plus	Laird	D057225	453-00071	https://launchstudio.bluetooth.com/ListingDetails/143874
Summit SOM 8M Plus	Laird	D057225	453-00071-K1	https://launchstudio.bluetooth.com/ListingDetails/143874
Summit SOM 8M Plus	Laird	D057225	453-00072	https://launchstudio.bluetooth.com/ListingDetails/143874
Summit SOM 8M Plus	Laird	D057225	453-00072-K1	https://launchstudio.bluetooth.com/ListingDetails/143874

It is a mandatory requirement of the Bluetooth Special Interest Group (SIG) that every product implementing Bluetooth technology has a Declaration ID. Every Bluetooth design is required to go through the qualification process, even when referencing a Bluetooth Design that already has its own Declaration ID. The Qualification Process requires each company to register as a member of the Bluetooth SIG – www.bluetooth.org

The following is a link to the Bluetooth Registration page: <https://www.bluetooth.org/login/register/>

For each Bluetooth Design, it is necessary to purchase a Declaration ID. This can be done before starting the new qualification, either through invoicing or credit card payment. The fees for the Declaration ID will depend on your membership status, please refer to the following webpage:

<https://www.bluetooth.org/en-us/test-qualification/qualification-overview/fees>

For a detailed procedure of how to obtain a new Declaration ID for your design, please refer to the following SIG document, (login is required to view this document):

https://www.bluetooth.org/DocMan/handlers/DownloadDoc.ashx?doc_id=283698&vId=317486

16.2 Qualification Steps When Referencing a Laird Controller Subsystem Design

To qualify your product when referencing a Laird Controller Subsystem design, follow these steps:

1. To start a listing, go to: https://www.bluetooth.org/tpg/QLI_SDoc.cfm

Note: A user name and password are required to access this site.

2. In step 1, select the option, New Listing and Reference a Qualified Design.
3. Enter 99404 in the Controller Subsystem table entry.
4. Enter your complimentary Host Subsystem and optional Profile Subsystem QDID in the table entry.
5. Select your pre-paid Declaration ID from the drop-down menu or go to the Purchase Declaration ID page.

Note: Unless the Declaration ID is pre-paid or purchased with a credit card, you cannot proceed until the SIG invoice is paid.

6. Once all the relevant sections of step 1 are finished, complete steps 2, 3, and 4 as described in the help document accessible from the site.

Your new design will be listed on the SIG website and you can print your Certificate and DoC.

For further information please refer to the following training material:

<https://www.bluetooth.org/en-us/test-qualification/qualification-overview/listing-process-updates>

If you require assistance with the qualification process please contact our recommended Bluetooth Qualification Expert (BQE), Steve Flooks, steve.flooks@eurexuk.com.
