BLUEBIRD INC.

Attestation

We, BLUEBIRD INC., attest that this device under FCC ID: SS4S20W1 complies with device protocol requirements and operational restrictions: for indoor client 6XD.

1. The device will only associate and connect with a low-power indoor access point or subordinatedevice and never directly connect to other client devices.

2. The device will always initiate transmission under the control of a low-power indoor AP orsubordinate except for brief transmissions before joining a network. These short messages will onlyoccur if the client has detected an indoor AP or subordinate operating on a channel. These briefmessages will have a time-out mechanism such that if it does not receive a response from an AP it willnot continually repeat the request.

3. The transmissions will be lower or equal to the power advertised by the indoor low-power accesspoint or subordinate and never above the maximum output power allowed by the FCC grant forequipment class 6XD.

4. The device is prohibited for control of or communications with unmanned aircraft systems, includingdrones.

Sincerely,

Yt. park
