RE: FCC ID: STENRPCS10D_ATCB002017

Attention: Jay Kim

I have a few comments on this Application. Please note that further comments may arise in response to answers provided to the questions below.

1. As this device has two antenna inputs it is not an amplifier as defined by the FCC. AS this device appears to be more in line with what the FCC calls a booster or repeater operating in the PCS bands it would therefore be a PCB equipment code. Please correct your 731 form to be in line with the accepted FCC rules.
2. Please note that this is a licensed device not subject to part 15 except as a digital device. As such, please explain why the part 15 2-condition statement has been included in the label.
3. Please provide the manual for this device.
4. Please note that for booster and other subclasses of amplifiers it is important that the device reproduce the input faithfully. This means that in order to determine if this is properly being done, the input plots are also required. Please provide all input plots for all signals provided in the report. Please provide input and output for all modulation types used in the booster.
5. Please note that as this device is a subclass of amplifier that operates over a range of frequencies, intermodulation testing is also required. Please provide the necessary intermodulation test data in accordance with FCC rules.
6. Please note that the FCC ID needs to be on the outside of the device. Please provide a location drawing showing the label on the outside, or alternately, please provide evidence that the location of the label is acceptable.
7. Please provide the necessary rf exposure information for this device.

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information may result in application termination. Correspondence should be considered part of the permanent submission and may be viewed from the Internet after a Grant of Equipment Authorization is issued.

Please do not respond to this correspondence using the email reply button. In order for your response to be processed expeditiously, you must submit your documents through the AmericanTCB.com website. Also, please note that partial responses increase processing time and should not be submitted.

Any questions about the content of this correspondence should be directed to the sender.
