Dennis,

Thank you for your quick reply.

For your comments, please see below.

1. We have two parts that we didn't open the cover(shield) in the photos in page 3. One is just filter part. It is not components. The other is drive amp part. It is very hard to open the cover. But If you want to have the photo for this, we will ask to my client to prepare it.
2. In the current product, there is no Bluetooth adapter. It is option for future model. You don't need to consider it.
3. We will include the input plot for low/middle/high from next application.

Thank you.

Jay Kim.
