

We, DIGI SINGAPORE PTE LTD, attest that this device under FCC ID: SUFAP3003E complies with device protocol requirements and operational restrictions for Indoor Client Devices (6XD).

- A. This device will only associate and connect with a low-power indoor access point or subordinate device and never directly connects to other client devices.
- B. This device will always initiate transmission under the control of a low power indoor AP or subordinate except for brief transmissions before joining a network. These short messages will only occur if this client has detected an indoor AP or subordinate operating on a channel. These brief messages will have a time-out mechanism such that if it does not receive a response from an AP it will not continually repeat the request.
- C. All transmissions will be lower or equal to the power advertised by the indoor low-power access point or subordinate and never above the maximum output power allowed by the FCC grant for equipment class 6XD.
- D. This device employs a Contention-Based Protocol as demonstrated in the test report.
- E. This device is prohibited for control of or communications with unmanned aircraft systems, including drones.
