## 1. ATTESTATION OF TEST RESULTS

### Applicant Information

Company Name: Zhejiang Dahua Vision Technology Co., Ltd.  
Address: No.1199, Bin'an road, Binjiang District, Hangzhou,  
P.R.China.

### Manufacturer Information

Company Name: Zhejiang Dahua Vision Technology Co., Ltd.  
Address: No.1199, Bin'an road, Binjiang District, Hangzhou,  
P.R.China.

### EUT Description

Product Name Access Standalone  
Model Name ASI1212F-D  
Additional No. DHI-ASI1212F-D, DH-ASI1212F-D, OEM-ASI1212F-D  
Sample Number 3002344  
Data of Receipt Sample Apr. 08, 2020  
Date Tested Apr. 11, 2020 ~ Jun. 26, 2020

## 2. TEST METHODOLOGY

The tests documented in this report were performed in accordance with FCC KDB 558074 D01 15.247 Meas Guidance v05r02, KDB 414788 D01 Radiated Test Site v01r01, ANSI C63.10-2013, FCC CFR 47 Part 2, FCC CFR 47 Part 15.

## 3. FACILITIES AND ACCREDITATION

|                           |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
|---------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Accreditation Certificate | <b>A2LA (Certificate No.: 4829.01)</b><br><b>UL-CCIC COMPANY LIMITED has been assessed and proved to be in compliance with A2LA.</b><br><b>FCC (FCC Designation No.: CN1247)</b><br><b>UL-CCIC COMPANY LIMITED has been recognized to perform compliance testing on equipment subject to the Commission's Declaration of Conformity (DoC) and Certification rules.</b><br><b>IC (IC Designation No.: 25056)</b><br><b>UL-CCIC COMPANY LIMITED has been recognized to perform compliance testing on equipment subject to the Commission's Declaration of Conformity (DoC) and Certification rules.</b> |

Note 1: All tests measurement facilities use to collect the measurement data are located at No. 2, Chengwan Road, Suzhou Industrial Park, Suzhou 215122, People's Republic of China

Note 2: For below 30MHz, lab had performed measurements at test anechoic chamber and comparing to measurements obtained on an open field site. These measurements below 30MHz had been correlated to measurements performed on an OFS.

Note 3: The test anechoic chamber in UL-CCIC COMPANY LIMITED had been calibrated and compared to the open field sites and the test anechoic chamber is shown to be equivalent to or worst case from the open field site.

## 4. CALIBRATION AND UNCERTAINTY

### 4.1. MEASURING INSTRUMENT CALIBRATION

The measuring equipment utilized to perform the tests documented in this report has been calibrated in accordance with the manufacturer's recommendations, and is traceable to recognized national standards.

### 4.2. MEASUREMENT UNCERTAINTY

Where relevant, the following measurement uncertainty levels have been estimated for tests performed on the apparatus:

| Test Item                                                                                                                                     | Uncertainty          |
|-----------------------------------------------------------------------------------------------------------------------------------------------|----------------------|
| Conduction emission                                                                                                                           | 3.1dB                |
| Radiation Emission test(include Fundamental emission)<br>(9KHz-30MHz)                                                                         | 3.4dB                |
| Radiation Emission test(include Fundamental emission)<br>(30MHz-1GHz)                                                                         | 3.4dB                |
| Radiation Emission test<br>(1GHz to 26GHz)( include Fundamental emission)                                                                     | 3.9dB (1GHz-18Gz)    |
|                                                                                                                                               | 4.2dB (18GHz-26.5Gz) |
| Note: This uncertainty represents an expanded uncertainty expressed at approximately the 95% confidence level using a coverage factor of k=2. |                      |

## 5. EQUIPMENT UNDER TEST

### 5.1. DESCRIPTION OF EUT

|                       |                                                                                                                                                                      |
|-----------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Product Name:         | Access Standalone                                                                                                                                                    |

| Channels Step:        | Channels with 5MHz step                                                                                                                                              |
| Sample Type:          | Fixed production                                                                                                                                                     |
| Test power grade:     | N/A                                                                                                                                                                  |
| Test software of EUT: | Secure CRT (manufacturer declare)                                                                                                                                    |
| Antenna Type:         | Patch Antenna                                                                                                                                                        |
| Antenna Gain:         | 1.4 dBi                                                                                                                                                              |

Remark:

Model No.:

| Number: | Name:          | Number: | Name:          | Number: | Name:         |
|---------|----------------|---------|----------------|---------|---------------|
| 1       | ASI1212F-D     | 2       | DHI-ASI1212F-D | 3       | DH-ASI1212F-D |
| 4       | OEM-ASI1212F-D | 5       |                | 6       |               |
| 7       |                | 8       |                |         |               |

Only the main model ASI1212F-D was tested and only the data of this model is shown in this test report.  
Since Their electrical circuit design, layout, components used and internal wiring are identical, only the model name and selling area are different.

## 5.2. MAXIMUM OUTPUT POWER

| Number of Transmit Chains (NTX) | IEE Std. 802.11  | Channel Number | Max Peak Conducted Power (dBm) | Max AVG Conducted Power (dBm) |
|---------------------------------|------------------|----------------|--------------------------------|-------------------------------|
| 1                               | IEEE 802.11B     | 1-11[11]       | 18.30                          | 15.57                         |
| 1                               | IEEE 802.11G     | 1-11[11]       | 21.44                          | 13.53                         |
| 1                               | IEEE 802.11nHT20 | 1-11[11]       | 20.85                          | 12.78                         |
| 1                               | IEEE 802.11nHT40 | 3-9[7]         | N/A                            | 12.60                         |

## 5.3. CHANNEL LIST

| Channel List for 802.11b/g/n (20 MHz) |                 |         |                 |         |                 |         |                 |
|---------------------------------------|-----------------|---------|-----------------|---------|-----------------|---------|-----------------|
| Channel                               | Frequency (MHz) | Channel | Frequency (MHz) | Channel | Frequency (MHz) | Channel | Frequency (MHz) |
| 1                                     | 2412            | 4       | 2427            | 7       | 2442            | 10      | 2457            |
| 2                                     | 2417            | 5       | 2432            | 8       | 2447            | 11      | 2462            |
| 3                                     | 2422            | 6       | 2437            | 9       | 2452            |         |                 |

| Channel List for 802.11n (40 MHz) |                 |         |                 |         |                 |         |                 |
|-----------------------------------|-----------------|---------|-----------------|---------|-----------------|---------|-----------------|
| Channel                           | Frequency (MHz) | Channel | Frequency (MHz) | Channel | Frequency (MHz) | Channel | Frequency (MHz) |
| 3                                 | 2422            | 5       | 2432            | 7       | 2442            | 9       | 2452            |
| 4                                 | 2427            | 6       | 2437            | 8       | 2447            |         |                 |

#### 5.4. TEST CHANNEL CONFIGURATION

| Test Mode         | Test Channel (MHz) |
|-------------------|--------------------|
| IEEE 802.11B      | LCH :CH01 2412     |
|                   | MCH: CH06 2437     |
|                   | HCH: CH11 2462     |
| IEEE 802.11G      | LCH :CH01 2412     |
|                   | MCH: CH06 2437     |
|                   | HCH: CH11 2462     |
| IEEE 802.11n HT20 | LCH :CH01 2412     |
|                   | MCH: CH06 2437     |
|                   | HCH: CH11 2462     |
| IEEE 802.11n HT40 | LCH :CH03 2422     |
|                   | MCH: CH06 2437     |
|                   | HCH: CH09 2452     |

#### 5.5. THE WORSE CASE POWER SETTING PARAMETER

| The Worse Case Power Setting Parameter under 2400 ~ 2483.5MHz Band |                         |              |      |       |            |      |      |
|--------------------------------------------------------------------|-------------------------|--------------|------|-------|------------|------|------|
| Test Software                                                      |                         | SecureCRT    |      |       |            |      |      |
| Modulation Mode                                                    | Transmit Antenna Number | Test Channel |      |       |            |      |      |
|                                                                    |                         | NCB: 20MHz   |      |       | NCB: 40MHz |      |      |
|                                                                    |                         | CH 1         | CH 6 | CH 11 | CH 3       | CH 6 | CH 9 |
| 802.11b                                                            | 1                       | N/A          | N/A  | N/A   | /          |      |      |
| 802.11g                                                            | 1                       | N/A          | N/A  | N/A   |            |      |      |
| 802.11n HT20                                                       | 1                       | N/A          | N/A  | N/A   |            |      |      |
| 802.11n HT40                                                       | 1                       | /            |      |       | N/A        | N/A  | N/A  |

## 5.6. DESCRIPTION OF AVAILABLE ANTENNAS

| Ant. | Frequency (MHz) | Antenna Type  | Antenna Gain (dBi) |
|------|-----------------|---------------|--------------------|
| 1    | 2400-2483.5     | Patch Antenna | 1.4                |

| Test Mode           | Transmit and Receive Mode                    | Description                                                           |
|---------------------|----------------------------------------------|-----------------------------------------------------------------------|
| IEEE 802.11b        | <input checked="" type="checkbox"/> 1TX, 1RX | Antenna1 can be used as transmitting/receiving antenna independently. |
| IEEE 802.11g        | <input checked="" type="checkbox"/> 1TX, 1RX | Antenna1 can be used as transmitting/receiving antenna independently. |
| IEEE 802.11N (HT20) | <input checked="" type="checkbox"/> 1TX, 1RX | Antenna1 can be used as transmitting/receiving antenna independently. |
| IEEE 802.11N (HT40) | <input checked="" type="checkbox"/> 1TX, 1RX | Antenna1 can be used as transmitting/receiving antenna independently. |

## 5.7. THE WORSE CASE CONFIGURATIONS

For the product, the NFC and WIFI module can transmit simultaneously, and this work mode was the worse mode, only the worse data of this mode was recorded in the report.

For WIFI module, the worst-case data rates as provided by the client were:

802.11b mode: 1 Mbps  
802.11b mode: 6 Mbps  
802.11n HT20 mode: MCS0  
802.11n HT40 mode: MCS0

## 5.8. TEST ENVIRONMENT

| Environment Parameter | Selected Values During Tests |           |
|-----------------------|------------------------------|-----------|
| Relative Humidity     | 55 ~ 65%                     |           |
| Atmospheric Pressure: | 1025Pa                       |           |
| Temperature           | TN                           | 23 ~ 28°C |
| Voltage :             | VL                           | N/A       |
|                       | VN                           | DC 12V    |
|                       | VH                           | N/A       |

Note: VL= Lower Extreme Test Voltage  
VN= Nominal Voltage  
VH= Upper Extreme Test Voltage  
TN= Normal Temperature

## 5.9. DESCRIPTION OF TEST SETUP

### SUPPORT EQUIPMENT

| Item | Equipment             | Brand Name | Model Name | Description      |
|------|-----------------------|------------|------------|------------------|
| 1    | Laptop                | ThinkPad   | E590       | N/A              |
| 2    | Fixed Frequency Board | N/A        | N/A        | Supply by UL Lab |
| 3    | Mouse                 | Lenovo     | N/A        | N/A              |

### I/O PORT

| Cable No | Port | Connector Type | Cable Type | Cable Length(m) | Remarks |
|----------|------|----------------|------------|-----------------|---------|
| 1        | USB  | USB to TTL     | USB        | 100cm Length    | N/A     |
| 2        | LAN  | LAN            | LAN        | 100cm Length    | N/A     |

### ACCESSORY

| Item | Accessory  | Brand Name | Model Name               | Description                                          |
|------|------------|------------|--------------------------|------------------------------------------------------|
| 1    | DC Adapter | HONOTO     | ADS-12AM-12<br>12012EPCU | INPUT:100-240V~50/60Hz 0.3A Max<br>OUTPUT:12.0V=1.0A |

### TEST SETUP

The EUT can work in an engineer mode with a software through a table PC.

## 7. ANTENNA PORT TEST RESULTS

### 7.1. ON TIME AND DUTY CYCLE

#### LIMITS

None; for reporting purposes only

#### PROCEDURE

FCC KDB 558074 Zero-Span Spectrum Analyzer Method

#### TEST SETUP

#### TEST ENVIRONMENT

|                     |        |                   |        |
|---------------------|--------|-------------------|--------|
| Temperature         | 22°C   | Relative Humidity | 56%    |
| Atmosphere Pressure | 101kPa | Test Voltage      | DC 12V |

#### RESULTS

| Mode         | On Time (msec) | Period (msec) | Duty Cycle x (Linear) | Duty Cycle (%) | Duty Cycle Correction Factor (db) | 1/T Minimum VBW (kHz) | Final VBW (kHz) |
|--------------|----------------|---------------|-----------------------|----------------|-----------------------------------|-----------------------|-----------------|
| 11B          | 12.41          | 12.46         | 0.9960                | 99.60%         | 0.02                              | 0.08                  | 0.1             |
| 11G          | 2.063          | 2.199         | 0.9382                | 93.82%         | 0.28                              | 0.48                  | 0.5             |
| 802.11n HT20 | 1.919          | 2.037         | 0.9420                | 94.21%         | 0.26                              | 0.52                  | 1               |
| 802.11n HT40 | 0.943          | 1.034         | 0.9120                | 91.20%         | 0.40                              | 1.06                  | 2               |

Note: 1) Duty Cycle Correction Factor=10log(1/x).  
2) Where: x is Duty Cycle(Linear)  
3) Where: T is On Time (transmit duration)

### 11G ON TIME AND DUTY CYCLE MID CH (WORSE CASE)

### 11N (HT20) ON TIME AND DUTY CYCLE MID CH (WORSE CASE)

### 11N (HT40) ON TIME AND DUTY CYCLE MID CH (WORSE CASE)

## 7.2. 6 dB BANDWIDTH

### LIMITS

| FCC Part15 (15.247) Subpart C |               |                      |                       |
|-------------------------------|---------------|----------------------|-----------------------|
| Section                       | Test Item     | Limit                | Frequency Range (MHz) |
| FCC 15.247(a)(2)              | 6dB Bandwidth | $\geq 500\text{KHz}$ | 2400-2483.5           |

### TEST PROCEDURE

Refer to FCC KDB 558074, connect the UUT to the spectrum analyser and use the following settings:

|                  |                                                |
|------------------|------------------------------------------------|
| Center Frequency | The centre frequency of the channel under test |
| Detector         | Peak                                           |
| RBW              | For 6 dB Bandwidth :100K                       |
| VBW              | For 6dB Bandwidth : $\geq 3 \times \text{RBW}$ |
| Trace            | Max hold                                       |
| Sweep            | Auto couple                                    |

Allow the trace to stabilize and measure the maximum width of the emission that is constrained by the frequencies associated with the two outermost amplitude points (upper and lower frequencies) that are attenuated by 6 dB relative to the maximum level measured in the fundamental emission.

### TEST SETUP

**RESULTS**

| Test Mode | Test Channel | 6dB bandwidth (MHz) | Result |
|-----------|--------------|---------------------|--------|
| 11B       | LCH          | 10.04               | Pass   |
|           | MCH          | 10.03               | Pass   |
|           | HCH          | 10.03               | Pass   |
| 11G       | LCH          | 16.34               | Pass   |
|           | MCH          | 16.32               | Pass   |
|           | HCH          | 16.35               | Pass   |
| 11N HT20  | LCH          | 17.56               | Pass   |
|           | MCH          | 17.56               | Pass   |
|           | HCH          | 17.56               | Pass   |
| 11N HT40  | LCH          | 35.08               | Pass   |
|           | MCH          | 33.91               | Pass   |
|           | HCH          | 35.14               | Pass   |

## Test Graphs

### 7.3. CONDUCTED OUTPUT POWER

#### LIMITS

| FCC Part15 (15.247) , Subpart C |              |                 |                       |
|---------------------------------|--------------|-----------------|-----------------------|
| Section                         | Test Item    | Limit           | Frequency Range (MHz) |
| FCC 15.247(b)(3)                | Output Power | 1 watt or 30dBm | 2400-2483.5           |

#### TEST PROCEDURE

Place the EUT on the table and set it in the transmitting mode.  
Remove the antenna from the EUT and then connect a low loss RF cable from the antenna port to the Power sensor.  
Measure the power of each channel.  
Peak Detector use for Peak result.  
AVG Detector use for AVG result.

#### TEST ENVIRONMENT

|                     |        |                   |        |
|---------------------|--------|-------------------|--------|
| Temperature         | 22°C   | Relative Humidity | 56%    |
| Atmosphere Pressure | 101kPa | Test Voltage      | DC 12V |

#### TEST SETUP

**RESULTS**

| Test Mode | Test Channel | Maximum<br>Conducted Output<br>Power (PK) | Maximum<br>Conducted Output<br>Power (AV) | LIMIT |

## 7.4. POWER SPECTRAL DENSITY

### LIMITS

| FCC Part15 (15.247) , Subpart C |                        |             |                       |
|---------------------------------|------------------------|-------------|-----------------------|
| Section                         | Test Item              | Limit       | Frequency Range (MHz) |
| FCC §15.247 (e)                 | Power Spectral Density | 8 dBm/3 kHz | 2400-2483.5           |

### TEST PROCEDURE

Refer to FCC KDB 558074, connect the UUT to the spectrum analyser and use the following settings:

|                  |                                                      |
|------------------|------------------------------------------------------|
| Center Frequency | The centre frequency of the channel under test       |
| Detector         | Peak                                                 |
| RBW              | $3 \text{ kHz} \leq \text{RBW} \leq 100 \text{ kHz}$ |
| VBW              | $\geq 3 \times \text{RBW}$                           |
| Span             | $1.5 \times \text{DTS bandwidth}$                    |
| Trace            | Max hold                                             |
| Sweep time       | Auto couple.                                         |

Allow trace to fully stabilize and use the peak marker function to determine the maximum amplitude level within the RBW.

If measured value exceeds limit, reduce RBW (no less than 3 kHz) and repeat.

### TEST ENVIRONMENT

|                     |        |                   |        |
|---------------------|--------|-------------------|--------|
| Temperature         | 22°C   | Relative Humidity | 56%    |
| Atmosphere Pressure | 101kPa | Test Voltage      | DC 12V |

### TEST SETUP

**RESULTS**

| Test Mode | Test Channel | Maximum Peak power spectral density (dBm/30kHz) | Result |
|-----------|--------------|-------------------------------------------------|--------|
| 11B       | LCH          | 3.19                                            | Pass   |

| FCC §15.247 (d)                 | Conducted Bandedge and Spurious Emissions | For b/g/n HT20 modes: at least 20 dB below that in the 100 kHz bandwidth within the band that contains the highest level of the desired power;<br>For HT40 mode: at least 30 dB below that in the 100 kHz bandwidth within the band that contains the highest level of the desired power |

### TEST PROCEDURE

Refer to FCC KDB 558074, connect the UUT to the spectrum analyser and use the following

|                  |                                                |
|------------------|------------------------------------------------|
| Center Frequency | The centre frequency of the channel under test |
| Detector         | Peak                                           |
| RBW              | 100K                                           |
| VBW              | $\geq 3 \times \text{RBW}$                     |
| Span             | 1.5 x DTS bandwidth                            |
| Trace            | Max hold                                       |
| Sweep time       | Auto couple.                                   |

settings:

Use the peak marker function to determine the maximum PSD level.

|                    |                                                                               |
|--------------------|-------------------------------------------------------------------------------|
| Span               | Set the center frequency and span to encompass frequency range to be measured |
| Detector           | Peak                                                                          |
| RBW                | 100K                                                                          |
| VBW                | $\geq 3 \times \text{RBW}$                                                    |
| measurement points | $\geq \text{span}/\text{RBW}$                                                 |
| Trace              | Max hold                                                                      |
| Sweep time         | Auto couple.                                                                  |

Use the peak marker function to determine the maximum amplitude level.
