Description of the operation modes

The operation modes described in this paragraph constitute a functionality of the sample under test for itself. Every operation mode takes a failure criteria for the immunity test that they were applying to it and a monitoring to guarantee performance of the same ones.

The operation modes used by the samples to which the present report refers, are shown in the following table:

Id	Description
OM/01	EUT ON. SRD without transmission mode. BLE active and without transmission. Managing work by zones. Heating mode. Power supply: 115 Vac.
OM/02	EUT ON. SRD in transmission mode. BLE ON with communication established with auxiliary device. Managing work by zones. Heating mode. Power supply: 115 Vac.
