Battery tips

1. After receiving the device (including batteries), we recommend customer immediately start to use, if couldn't, store period should not exceed 3 months.
2. Please always charge battery in time after drain. Do not store battery with drain or full condition. We suggest keep battery capacity at around 50% when store.
3. Please use authorized charger to charge. Do not use 3rd party's cradle or adapter.
4. If not use the device for long period of time please keep the battery and the device separately.
5. The battery stored in warehouse, must charge/discharge once every 3 months, keep 60% to 70% capacity .
6. Lithium-ion battery should be stored in a cool, dry, ventilated environment, recommend to store between 0 to 28 ℃.
7. Do not use metal to contact or short circuit between two electrodes. Do not put device into overheating, excessive tide or decay environment. Do not squeeze or collision.

Transportation Notice

- 1、It's forbidden for transport when temperature is higher than 65℃.
- 2、The battery needs to be individual packed, do not directly stack without protection. Avoid battery electrodes contact to short circuit.
- 3、Suggest isolate each battery by bags, paper, foam or other isolation materials before pack in the carton.
- 4、Fill the room of carton by cushioning material before packing to avoid shaking.

Precautions

1. Read all information in this guide before using the device to ensure safe and proper operation.
2. Please use the accessories that have been approved by this manufacture and corresponds to this model. Use of any power source, charger, battery, etc. that has not been approved by this manufacture may cause fire, explosion, or other hazards.
3. Please use device and accessories within the specified temperature range. Equipment failure may occur when the ambient temperature is too high or too low.
4. Do not disassemble the product and its accessories. If the equipment or any of its components are not working properly.
5. The battery is made from a flammable and explosive material. Do not disassemble, squeeze, drop and make any other destructive operations on the battery. Do not place the battery in high temperatures.
6. Disposal of used batteries is subject to local relevant documents or policies regarding disposal of used batteries.

Warranty Policy

Thank you for using Urovo smart terminal series products. In the situation of quality problems, which arise from raw materials or production processes, during normal use of purchased products, UROVO TECHNOLOGY LTD. will be responsible for free maintenance within one year from the date of purchase. The company may provide repairs due to the user's failure to use the product according to the provided instructions of the product. However, corresponding service fee and component fee will be charged.

Warranty Terms:

1. Under normal circumstances, the warranty period of the device is 12 months (3 months for accessories), subject to the sales agreement.
2. During the product warranty period, under the normal use conditions (determined by our technical staff), the user will be entitled to a free warranty for damaged or faulty warranty parts.
3. During the warranty period, faults caused by repair, disassembly or modification of the product by a personnel other than our company, improper installation, improper use by the user (failure to follow instructions), serial number damage, accident or natural disaster, will not be covered under the warranty.
4. The warranty will expire immediately if any alterations are made to the warranty card.
5. Please show the equipment SN and purchase certificate for repair. The company reserves the right to interpret the above contents.

FCC regulatory conformance :

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference.

(2) This device must accept any interference received, including interference that may cause undesired operation.

NOTE: This equipment has been tested and found to comply with the limits for a **Class B** digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide

reasonable protection against harmful interference in a residential installation.

This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio

communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help

NOTE: The manufacturer is not responsible for any radio or TV interference caused by unauthorized modifications to this equipment. Such modifications could void the user ' s authority to operate the equipment.

RF exposure information:

The SAR limit of FCC is 1.6W/kg(Body-worn, Extremity), 4.0W/kg(Specific) averaged over one gram of tissue. Device has also been tested with 10mm(Body-worn), 10mm (Hotspot), 0mm(Extremity) against this SAR limit.
