- AmpliFi app for Android™
- Connecting to the default AmpliFi wireless network (SSID) from a computer or tablet.

App Users

Download and install the AmpliFi app from the App Store or Google Play™ Store.

If you are not using the app to install the AmpliFi Router, please skip step 1.

1 Launch the AmpliFi app.

iPhone Users: Ensure that Bluetooth is enabled.
Android Users: Ensure that Wi-Fi is enabled.

2 Power off your broadband modem.

- 3** Connect one end of the *Ethernet Cable* to your broadband modem and the other end to the Internet  port on the AmpliFi Router.

- 4** Connect the *Power Adapter* to the power  port on the AmpliFi Router.

- 5** Connect the *Power Adapter* to a power outlet.

6 Power on your broadband modem.

7 **App Users** Follow the on-screen instructions to configure your AmpliFi Router.

Non-App Users Perform the following steps:

- 1 Tap the touchscreen on the AmpliFi Router.

- 2 Use a computer or tablet to connect to the unique wireless network (SSID) displayed on the screen of your AmpliFi Router.

- 3** Launch a web browser to trigger the following *AmpliFi Wi-Fi Setup Wizard*. When prompted, name your wireless network and create a password.

The screenshot shows the AmpliFi Wi-Fi Setup Wizard web interface. At the top left is the 'AMPLIFI' logo. At the top right is a blue button labeled 'Contact support'. The main heading is 'AmpliFi™ Wi-Fi Setup Wizard'. Below this is a white box containing the AmpliFi logo and the device ID 'AF-R-HD-020855'. The setup steps are: 'Name Your Wireless Network' with a text input field, 'Create Your Wireless Password' with a text input field, and a checkbox labeled 'Use the same password for administration' which is checked. At the bottom right of the white box is a green button labeled 'Save & Continue'.

- 4** Click **Save & Continue**.
- 5** Connect to the new wireless network you created in the previous step.

Installation of the Teleport

1 Using the mobile app, connect to the AmpliFi Router wireless network that you created in the *AmpliFi Setup Wizard* on page 13.

2 Tap the Teleport icon and select **Test Connectivity**.

If any portion of the test fails, please refer to amplifi.com/teleport/guide for assistance.

3 Connect the Teleport to a power outlet and wait for the LED to start flashing with a full circle.

4 Connect your mobile device or computer to the wireless network named **Teleport XXXXXX**, where XXXXXX represents the last six characters of the Teleport's MAC address, which is located on the device label.

5 When the setup portal opens (tap **Sign in to Wi-Fi Network** or manually browse to <http://amplifi.lan>, if necessary) configure the wireless network you will use to access Teleport in the future. It will replace the wireless network described in step 4.

- 6 Select the network you will use to connect Teleport to the internet.
- 7 Teleport will reconfigure as needed and connect to the network you selected.
- 8 Connect to the wireless network you configured in step 5 to continue setup (tap on Sign in to Wi-Fi network or browse to <http://amplifi.lan> if the setup portal doesn't open automatically).

If the network you selected in step 6 has a guest portal, you will be redirected there for authentication, after which setup will resume (this can take longer on some devices, but you can speed it up by reconnecting to Teleport).

- 9 Using the mobile app, tap Yes, pair this Teleport to pair the Teleport with the AmpliFi Router after verifying that its MAC address matches the device label.
- 10 Teleport will connect to your home network. The setup portal may close during this process.

11 Verify that setup was successful by browsing the web or checking Teleport's status in the mobile app.

It is recommended that you enable Remote Access on the router. (See page 20.)

If you selected your home Wi-Fi in step 6, relocate Teleport to a different network. This may include a different home, office, hotel, public Wi-Fi, or mobile hotspot.

You can reconfigure your Teleport at any time by opening <http://amplifi.lan> in your browser.

The pairing between the Teleport and your router can be cancelled at any time by resetting either of the devices. This is useful if the Teleport is ever lost or stolen.

Resetting to Factory Defaults

Factory defaults can be restored to either device. Using an object such as a straightened paper clip or pin, press the *Reset* button located on the bottom of the AmpliFi Router or Teleport device for approximately 10 seconds until the LED turns off.
