

Annex C

Undesireable Radiated Spurious

Annex C Notes:

1. The emissions that are over the limit in the 30 – 1000 MHz plots are from digital circuitry and not the transmitter, therefor these emissions only need to meet the -27 dBm/MHz general emission requirements.
2. Throughout Annex C, for all plots above 1 GHz, other than the fundamental transmitter frequency, for any peak emission over the restricted band average limit was examined with an average detector and additional plots were supplied.
3. Emissions were investigated up to 40 GHz with only noise floor seen after 26.5 GHz.
