

UniFi LED
Network-Managed
LED Panel Powered by AC
Model: ULED-AC

QUICK START GUIDE

Introduction

Thank you for purchasing the Ubiquiti Networks® UniFi® LED Panel. This Quick Start Guide is designed to guide you through installation and includes warranty terms.

Package Contents

System Requirements

- Network switch (for wired configuration), or access point (for wireless configuration)
- UniFi LED mobile app software
 - Mobile device: iOS 10 or Android 5.0
- UniFi LED Controller software
 - Computer: UniFi Application Server 0.5.0, Ubuntu 16.04 LTS (Xenial Xerus) 64-bit or Debian 9 64-bit
 - Web browser: Google Chrome (Other browsers may have limited functionality)
- UniFi Dimmer Switch, model UDIM-AC or UDIM-AT

TERMS OF USE: Ubiquiti radio devices must be professionally installed. Shielded Ethernet cable and earth grounding must be used as conditions of product warranty. "TOUGH Cable" is designed for outdoor installations. It is the professional installer's responsibility to follow local country regulations, including operation within legal frequency channels, output power, and Dynamic Frequency Selection (DFS) requirements.

Installation Requirements

- Phillips screwdriver
- Wire stripper/cutter
- Needle-nose pliers (Optional)

IMPORTANT: The ULED-AC is to be installed by a qualified electrician in accordance with local electrical codes and regulations.

IMPORTANT : Le ULED-AC doit être installé par un électricien qualifié conformément aux codes électriques locaux et des règlements.

WARNING: TO AVOID FIRE, SHOCK OR DEATH, turn off power at the circuit breaker or fuse before installing.

AVERTISSEMENT : POUR ÉVITER TOUT RISQUE D'INCENDIE, D'ÉLECTROCUTION OU DE DÉCÈS, coupez le courant au niveau du disjoncteur ou du coupe-circuit ou fusible avant l'installation.

Network Topology Requirements

Network topology requirements are as follows:

- DHCP-enabled network (for the UniFi LED Panel to obtain an IP address)
- Network switch (for wired configuration), or access point (for wireless configuration)
- For UniFi Dimmer Switch only:
A UniFi Dimmer Switch connected to the same Layer 2 network as the UniFi LED Panel
- For LED Controller software:
A UniFi Application Server running the UniFi LED Controller software and connected to the same Layer 2 network as the UniFi LED Panel
- For UniFi LED app only:
A UniFi AP connected to the same Layer 2 network as the UniFi LED Panel

Connection Options

A UniFi LED Panel can use either a wired connection or a wireless connection. A wired connection to a switch allows immediate detection and control by the LED Controller, but if a panel is in a location where Ethernet cabling is not a reasonable option, then the panel can connect via Wi-Fi to a UniFi AP.

Control Options

You can control the UniFi LED Panel's state (on/off) and brightness. There are three ways to control the Panel:

UniFi Dimmer Switch A user in the immediate vicinity controls the UniFi LED Panel using the UniFi Dimmer Switch.

UniFi LED App over Layer 2 Network A local user runs the app to connect to a UniFi AP on the same Layer 2 network as the UniFi LED Panel.

UniFi LED Controller over Layer 2 Network A local user runs the LED Controller software on the same Layer 2 network as the UniFi LED Panel.

Daisy-Chain Configuration

For installations using multiple UniFi LED Panels in a wired configuration, we recommend using a daisy chain topology, as illustrated in the following diagram.

Hardware Overview

LED

State	Status
Flashing White	Initializing.
Steady White	System ready.
Steady Blue	Adopted by LED Controller.
Alternating White/Blue	Firmware upgrade is taking place.

Ports

Ethernet Use these 10/100 Ethernet ports to connect to the LAN or to daisy-chain with other UniFi LED Panels.

MAC Sticker Used to scan the MAC address. For details, refer to "Quick Setup".

Button

Reset The Reset button serves two functions:

- **Restart** Press and release the Reset button quickly.
- **Restore to Factory Default Settings** Press and hold the Reset button for more than five seconds.

Terminal Block

N L ⊕ Connections for AC power: *N* (Neutral), *L* (Live), and ⊕ (Earth ground). Each has two connectors, used to connect to the power source, and optionally to connect to another UniFi LED Panel (daisy-chain configuration).

Installation

To install and configure the UniFi LED Panel:

1. Lift the panel and seat it in an opening in the ceiling grid.

2. If the panel will use Wi-Fi to connect to the network, go to step 3. If the panel will use a wired connection to the network, connect an Ethernet cable to the *Main* port.

3. Remove the screw from the cover of the Junction Box and open the cover.

4. Remove a knockout from the *Junction Box* and feed the power cable through the knockout into the *Junction Box*.

5. Connect each of the cable's wires to the appropriate *Terminal Block* connector as follows:

- Connect the Neutral (white) wire to **N**.
- Connect the Live (red) wire to **L**.
- Connect the Earth ground (green) wire to ⊕.

Note: To connect a wire, push it into the *Terminal Block* connector until it is securely held. To release a wire, push the button next to it.

Note: We recommend using UL-certified 14 AWG single-core copper wire.

Daisy Chain Configuration (Optional)

For each additional panel in the chain:

1. Make the following changes to the UniFi LED Panel which is currently the **last panel** in the chain:
 - a. If the new panel will use a wired connection to the network, connect an Ethernet cable to the *Secondary* port of the current last UniFi LED Panel.

- b. Connect a stripped power cable to the *Terminal Block* on the UniFi LED Panel: Neutral (white) to **N**, Live (red) to **L**, and Earth ground (green) to ⊕.

2. Connect the new panel as described in steps 2-5 of *Installation*.

Configuring the UniFi LED Panel

Follow the instructions for the software you wish to use:

UniFi LED App

1. Install the UniFi LED app on your smartphone or mobile device. The app is available from the App Store® or Google Play™ Store.

2. Enable Bluetooth on your mobile device.
3. Launch the app.

4. If the UniFi LED Panel has a wired connection, it will be automatically detected and shown on the UniFi LED app. If the UniFi LED Panel will be connected wirelessly, follow the on-screen instructions to locate and connect it to your wireless network.

UniFi LED Controller Software

1. Install the latest version of the UniFi LED Controller software on a computer on the same Layer 2 network as the UniFi LED Panel:

- **Ubuntu users** Download the software from: www.ubnt.com/download/unifi-led
- **UAS users** Install the software using the UniFi Application Server (UAS) management console.

2. Launch a web browser and go to: <http://localhost:20080>

3. The UniFi LED Controller will appear, allowing you to configure the UniFi LED Panel and customize other settings.

For additional details on the UniFi LED Controller, refer to the User Guide available at: www.ubnt.com/download/unifi

Quick Setup

This section describes the Quick Setup procedure for installations with large numbers of UniFi LED Panels and Dimmer Switches. The Quick Setup requires using the UniFi LED app along with a *QR Code Log* that you create. Each UniFi LED Panel or Dimmer Switch has a removable *MAC Sticker* on its reverse side; this has a QR code used to scan the device's MAC address. The Quick Setup consists of these steps:

- Create the *QR Code Log*
- Install the LED Panels and Dimmer Switches
- Scan the QR codes

Create the QR Code Log

- Download the *QR Code Log* template at: ubnt.link/QR-Code-Log
- Print out as many copies as needed (each sheet can log up to 16 LED Panels and 3 Dimmer Switches).

- Fill in the *Site* (such as "1st Floor Meeting Room") and *Controller* (such as "UniFi LED Controller") on each sheet.

Install the LED Panels and Dimmer Switches

For each UniFi LED Panel or Dimmer Switch:

- Remove the *MAC Sticker* from the back of the device by carefully peeling back and pulling the blue tab.

- Place the sticker on the *QR Code Log* sheet that matches the device's location.

- Install the device as described in the *Installation* section of the device's Quick Start Guide.

Scan the QR Codes

- On your mobile device, open the UniFi LED app.
- Go to the *More* screen. Tap **Quick Setup**.

- Follow the instructions as the UniFi LED app guides you through the process of adding devices by scanning the QR codes on the *QR Code Log* sheet(s).

Note: Instead of scanning the QR codes, you can also use the UniFi LED app's *Locate* function to identify and assign individual LED Panels to their groups; however, this is best suited for smaller installations.

Safety Notices

- Read, follow, and keep these instructions.
 - Heed all warnings.
 - Only use attachments/accessories specified by the manufacturer.
- WARNING:** Do not use this product in location that can be submerged by water.
- WARNING:** Avoid using this product during an electrical storm. There may be a remote risk of electric shock from lightning.
- WARNING:** The ULED-AC is to be installed by a qualified electrician in accordance with local electrical codes and regulations.
- AVERTISSEMENT :** Le ULED-AC doit être installé par un électricien qualifié conformément aux codes électriques locaux et des règlements.
- WARNING:** TO AVOID FIRE, SHOCK OR DEATH, turn off power at the circuit breaker or fuse before installing.
- AVERTISSEMENT :** POUR ÉVITER TOUT RISQUE D'INCENDIE, D'ÉLECTROCUTION OU DE DÉCÈS, coupez le courant au niveau du disjoncteur ou du coupe-circuit ou fusible avant l'installation.

Limited Warranty

- Compliance is required with respect to voltage, frequency, and current requirements indicated on the manufacturer's label. Connection to a different power source than those specified may result in improper operation, damage to the equipment or pose a fire hazard if the limitations are not followed.
- There are no operator serviceable parts inside this equipment. Service should be provided only by a qualified service technician.

Limited Warranty

UBIQUITI NETWORKS, Inc ("UBIQUITI NETWORKS") warrants that the product(s) furnished hereunder (the "Product(s)") shall be free from defects in material and workmanship for a period of one (1) year from the date of shipment by UBIQUITI NETWORKS under normal use and operation. UBIQUITI NETWORKS' sole and exclusive obligation and liability under the foregoing warranty shall be for UBIQUITI NETWORKS, at its discretion, to repair or replace any Product that fails to conform to the above warranty during the above warranty period. The expense of removal and reinstallation of any Product is not included in this warranty. The warranty period of any repaired or replaced Product shall not extend beyond its original term.

Warranty Conditions

The above warranty does not apply if the Product:

- has been modified and/or altered, or an addition made thereto, except by Ubiquiti Networks, or Ubiquiti Networks' authorized representatives, or as approved by Ubiquiti Networks in writing;
- has been painted, rebranded or physically modified in any way;
- has been damaged due to errors or defects in cabling;
- has been subjected to misuse, abuse, negligence, abnormal physical, electromagnetic or electrical stress, including lightning strikes, or accident;
- has been damaged or impaired as a result of using third party firmware;
- has no original Ubiquiti MAC label, or is missing any other original Ubiquiti label(s); or
- has not been received by Ubiquiti within 30 days of issuance of the RMA.

In addition, the above warranty shall apply only if: the product has been properly installed and used at all times in accordance, and in all material respects, with the applicable Product documentation; all Ethernet cabling runs use CAT5 (or above), and for outdoor installations, shielded Ethernet cabling is used, and for indoor installations, indoor cabling requirements are followed.

Returns

No Products will be accepted for replacement or repair without obtaining a Return Materials Authorization (RMA) number from UBIQUITI NETWORKS during the warranty period, and the Products being received at UBIQUITI NETWORKS' facility freight prepaid in accordance with the RMA process of UBIQUITI NETWORKS. Products returned without an RMA number will not be processed and will be returned freight collect or subject to disposal. Information on the RMA process and obtaining an RMA number can be found at: www.ubnt.com/support/warranty

Note

Some countries, states and provinces do not allow exclusions of implied warranties or conditions, so the above exclusion may not apply to you. You may have other rights that vary from country to country, state to state, or province to province. Some countries, states and provinces do not allow the exclusion or limitation of liability for incidental or consequential damages, so the above limitation may not apply to you. EXCEPT TO THE EXTENT ALLOWED BY LOCAL LAW, THESE WARRANTY TERMS DO NOT EXCLUDE, RESTRICT OR MODIFY, AND ARE IN ADDITION TO, THE MANDATORY STATUTORY RIGHTS APPLICABLE TO THE LICENSE OF ANY SOFTWARE (EMBEDDED IN THE PRODUCT) TO YOU. The United Nations Convention on Contracts for the International Sale of Goods shall not apply to any transactions regarding the sale of the Products.

Compliance

FCC

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment. This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions.

- This device may not cause harmful interference, and
- This device must accept any interference received, including interference that may cause undesired operation.

This equipment has been tested and found to comply with the limits for a Class A digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instruction manual, may cause harmful interference to radio communications. Operations of this equipment in a residential area is likely to cause harmful interference in which case the user will be required to correct the interference at his own expense.

This radio transmitter FCC ID: SWX-ULEDACR has been approved by FCC.

ISED Canada

CAN ICES-3(A)/NMB-3(A)

This device complies with ISED Canada licence-exempt RSS standard(s). Operation is subject to the following two conditions:

- This device may not cause interference, and
- This device must accept any interference, including interference that may cause undesired operation of the device.

This radio transmitter (IC: 6545A-ULEDACR) has been approved by ISED Canada.

CAN ICES-3(A)/NMB-3(A)

Le présent appareil est conforme aux CNR d'ISED Canada applicables aux appareils radio exempts de licence. L'exploitation est autorisée aux deux conditions suivantes :

- L'appareil ne doit pas produire de brouillage;
- L'appareil doit accepter tout brouillage radioélectrique subi, même si le brouillage est susceptible d'en compromettre le fonctionnement.

Le présent émetteur radio (IC : 6545A-ULEDACR) a été approuvé par ISED Canada.

RF Exposure Warning

The antennas used for this transmitter must be installed to provide a separation distance of at least 20 cm from all persons and must not be located or operating in conjunction with any other antenna or transmitter. Les antennes utilisées pour ce transmetteur doivent être installées en considérant une distance de séparation de toute personne d'au moins 20 cm et ne doivent pas être localisées ou utilisées en conflit avec tout autre antenne ou transmetteur.

Australia and New Zealand

Warning: This is a Class A product. In a domestic environment this product may cause radio interference in which case the user may be required to take adequate measures.

CE Marking

CE marking on this product represents the product is in compliance with all directives that are applicable to it.

Note: This device meets Max. TX power limit per ETSI regulations.
