

EXHIBIT 3 - EUT INTERNAL PHOTOGRAPHS**EUT Housing and Board
View 1****EUT Housing and Board
View 2**

Solder Board-Component View 1	 A photograph of a circular printed circuit board (PCB) component, labeled 'FL 21710-U2', mounted on a blue textured surface. The component is surrounded by a black L-shaped ruler with white markings in millimeters. The component features a central rectangular cutout and is populated with several small, yellow, square surface-mount components. The ruler shows dimensions from 0 to 100 mm on both the horizontal and vertical axes.
Solder Board-Component View 2	 A photograph of the same circular PCB component, labeled 'FL 21710-U2', mounted on a blue textured surface. The component is surrounded by a black L-shaped ruler with white markings in millimeters. The component features a central rectangular cutout and is populated with several small, yellow, square surface-mount components. The ruler shows dimensions from 0 to 100 mm on both the horizontal and vertical axes.

Solder Board-Component View 3	 A photograph of a small green printed circuit board (PCB) component, labeled '3', positioned on a blue textured surface. The component is rectangular with a white label on the left side. It features several electronic components, including a small black integrated circuit (IC) and several resistors. Two thin wires are soldered to the right side of the board. A black ruler with white markings is placed horizontally below the component, showing measurements in millimeters (0 to 100 mm) and centimeters (0 to 10 cm).
Solder Board-Component View 4	 A photograph of a small green printed circuit board (PCB) component, labeled '4', positioned on a blue textured surface. The component is rectangular with a white label on the left side. It features several electronic components, including a small black integrated circuit (IC) and several resistors. Two thin wires are soldered to the right side of the board. A black ruler with white markings is placed horizontally below the component, showing measurements in millimeters (0 to 100 mm) and centimeters (0 to 10 cm).

Solder Board-Component View 5	 A photograph of a green printed circuit board (PCB) component, likely a WiFi module, resting on a blue textured surface. The component is positioned next to a black ruler with white markings. The ruler shows measurements in millimeters (mm) from 0 to 90. The component has various electronic components soldered onto it, including a white rectangular chip, several small black and silver components, and two thin wires extending from the right side. The component is oriented vertically, with the ruler placed horizontally to its left.
Antenna View	 A photograph of the same green PCB component from a different angle, focusing on the antenna. A red rectangular box highlights the antenna area, and a red line points from the text "WIFI Antenna" to this box. The component is placed on a blue textured surface. The antenna is a small, white, rectangular chip with a QR code and some text on it. It is soldered to the PCB. The component has various electronic components soldered onto it, including a white rectangular chip, several small black and silver components, and two thin wires extending from the bottom.
