

# TEST REPORT

**Applicant:** Feit Electric Company

**Address of Applicant:** 4901 Gregg Road, Pico Rivera, California 90660, United States

**Manufacturer:** SIGNCOMPLEX LIMITED

**Address of Manufacturer:** No.70 Hexiang West Road, Heshan Industrial Park, Heshan, Guangdong, China

**Factory:** SIGNCOMPLEX (THAILAND) COMPANY LIMITED

**Address of Factory:** 368/2 MOO 8 Mapkha subdistrict, Nikhom Phatthana district, Royong 21180, Thailand

**Equipment Under Test (EUT)**

Product Name: Remote Controller

Model No.: FEODRGBW/REM

Trade Mark: Feit Electric

**FCC ID:** SYW-ODRGBWREM

**Applicable standards:** FCC CFR Title 47 Part 15 Subpart C Section 15.231

**Date of sample receipt:** August 22, 2024

**Date of Test:** August 23-30, 2024

**Date of report issued:** August 30, 2024

**Test Result :** PASS \*

\* In the configuration tested, the EUT complied with the standards specified above.

Authorized Signature:

**Robinson Luo**  
**Laboratory Manager**

This results shown in this test report refer only to the sample(s) tested, this test report cannot be reproduced, except in full, without prior written permission of the company. The report would be invalid without specific stamp of test institute and the signatures of compiler and approver.

## 4 Test Summary

| Test Item                                | Section in CFR 47 | Result |
|------------------------------------------|-------------------|--------|
| Antenna Requirement                      | 15.203            | Pass   |
| Conduction Emission                      | 15.207            | N/A    |
| Field strength of the Fundamental Signal | 15.231 (b)        | Pass   |
| Spurious Emissions                       | 15.231 (b)/15.209 | Pass   |
| 20dB Bandwidth                           | 15.231 (c)        | Pass   |
| Deactivation Testing                     | 15.231 (a)(2)     | Pass   |

Pass: The EUT complies with the essential requirements in the standard.

N/A: Not applicable.

### 4.1 Measurement Uncertainty

| No. | Item                             | Measurement Uncertainty              |
|-----|----------------------------------|--------------------------------------|
| 1   | Radio Frequency                  | $\pm 7.25 \times 10^{-8}$            |
| 2   | Duty cycle                       | $\pm 0.37\%$                         |
| 3   | Occupied Bandwidth               | $\pm 3\%$                            |
| 4   | RF conducted power               | $\pm 0.75\text{dB}$                  |
| 5   | RF power density                 | $\pm 3\text{dB}$                     |
| 6   | Conducted Spurious emissions     | $\pm 2.58\text{dB}$                  |
| 7   | AC Power Line Conducted Emission | $\pm 3.44\text{dB}$ (0.15MHz~30MHz)  |
| 8   | Radiated Spurious emission test  | $\pm 3.1\text{dB}$ (9kHz-30MHz)      |
|     |                                  | $\pm 3.8039\text{dB}$ (30MHz-200MHz) |
|     |                                  | $\pm 3.9679\text{dB}$ (200MHz-1GHz)  |
|     |                                  | $\pm 4.29\text{dB}$ (1GHz-18GHz)     |
|     |                                  | $\pm 3.30\text{dB}$ (18GHz-40GHz)    |
| 9   | Temperature test                 | $\pm 1^\circ\text{C}$                |
| 10  | Humidity test                    | $\pm 3\%$                            |
| 11  | Time                             | $\pm 3\%$                            |

## 5 General Information

### 5.1 General Description of EUT

|                        |                                 |
|------------------------|---------------------------------|
| Product Name:          | Remote Controller               |
| Model No.:             | FEODRGBW/REM                    |
| S/N:                   | N/A                             |
| Test sample(s) ID:     | GTS2024080236-1                 |
| Sample(s) Status:      | Engineer sample                 |
| Operation Frequency:   | 433.92MHz                       |
| Modulation technology: | ASK                             |
| Antenna Type:          | PCB Antenna                     |
| Antenna gain:          | 0dBi(declare by applicant)      |
| Power supply:          | DC 3V(2*1.5V Size"AAA" Battery) |

Remark:

1. Antenna gain information provided by the customer
2. The relevant information of the sample is provided by the entrusting company, and the laboratory is not responsible for its authenticity.

## 5.2 Test mode

|                                              |                                   |
|----------------------------------------------|-----------------------------------|
| Transmitting mode                            | Keep the EUT in transmitting mode |
| Remark: New battery is used during all test. |                                   |

### Per-test mode.

We have verified the construction and function in typical operation, The EUT was placed on three different polar directions; i.e. X axis, Y axis, Z axis. which only the worst case was shown in this test report(Only show the worst case:Y axis) and defined as follows:

| 433.92MHz | Axis                   | X     | Y     | Z     |
|-----------|------------------------|-------|-------|-------|
|           | Field Strength(dBuV/m) | 78.63 | 79.19 | 77.57 |

## 5.3 Description of Support Units

None.

## 5.4 Test Facility

The test facility is recognized, certified, or accredited by the following organizations:

- **FCC —Registration No.: 381383**

Designation Number: CN5029

Global United Technology Services Co., Ltd., Shenzhen EMC Laboratory has been registered and fully described in a report filed with the (FCC) Federal Communications Commission. The acceptance letter from the FCC is maintained in files.

- **ISED—Registration No.: 9079A**

CAB identifier: CN0091

The 3m Semi-anechoic chamber of Global United Technology Services Co., Ltd. has been registered by Certification and Engineering Bureau of ISED for radio equipment testing.

- **NVLAP (LAB CODE:600179-0)**

Global United Technology Services Co., Ltd., is accredited by the National Voluntary Laboratory Accreditation Program (NVLAP).

## 5.5 Test Location

All tests were performed at:

Global United Technology Services Co., Ltd.

No.123-128, Tower A, Jinyuan Business Building, No.2, Laodong Industrial Zone,  
Xixiang Road, Baoan District, Shenzhen, Guangdong, China

Tel: 0755-27798480

Fax: 0755-27798960

## 5.6 Other Information Requested by the Customer

None.

## 5.7 Additional Instructions

EUT Software Settings:

|      |                                                             |
|------|-------------------------------------------------------------|
| Mode | Continuously transmitter by manufacturer, power set default |
|------|-------------------------------------------------------------|

## 6 Test Instruments list

| Radiated Emission: |                                     |                                |                       |               |                     |                         |
|--------------------|-------------------------------------|--------------------------------|-----------------------|---------------|---------------------|-------------------------|

## Measurement data:

### 7.2.1 Field Strength of The Fundamental Signal

#### Peak value:

| Frequency (MHz) | Read Level (dBuV) | Antenna Factor (dB/m) | Cable Loss (dB) | Preamp Factor (dB) | Level (dBuV/m) | Limit Line (dBuV/m) | Over Limit (dB) | polarization |
|-----------------|-------------------|-----------------------|-----------------|--------------------|----------------|---------------------|-----------------|--------------|
| 433.92          | 91.78             | 15.58                 | 3.99            | 32.23              | 79.12          | 100.83              | -21.71          | Vertical     |
| 433.92          | 91.85             | 15.58                 | 3.99            | 32.23              | 79.19          | 100.83              | -21.64          | Horizontal   |

#### Average value:

| Frequency (MHz) | Peak Value (dBuV/m) | Duty cycle factor | Average value (dBuV/m) | Limit Line (dBuV/m) | Over Limit (dB) | Polarization |
|-----------------|---------------------|-------------------|------------------------|---------------------|-----------------|--------------|
| 433.92          | 79.12               | -9.74             | 69.38                  | 80.83               | -11.45          | Horizontal   |
| 433.92          | 79.19               | -9.74             | 69.45                  | 80.83               | -11.38          | Vertical     |

#### Remarks:

1. Final Level =Receiver Read level + Antenna Factor + Cable Loss – Preamplifier Factor

| Average value:     |                                                                  |
|--------------------|------------------------------------------------------------------|
| Calculate Formula: | Average value=Peak value + Duty Cycle Factor                     |
|                    | Duty cycle factor=20 log(Duty cycle)                             |
|                    | Duty cycle=on time/100 milliseconds or period, whichever is less |
| Test data:         | T on time =32.6(ms)                                              |
|                    | T period =100(ms)                                                |
|                    | Duty cycle=0.326                                                 |
|                    | duty cycle factor=-9.74                                          |

The formula as below:

$$T \text{ on time} = (0.46 \times 38) + (1.26 \times 12) = 17.48 + 15.12 = 32.6$$

$$Duty \text{ cycle} = T \text{ on time} / T \text{ period} = 32.6 / 100 = 0.326$$

$$Duty \text{ cycle factor} = 20 \log(0.326) = -9.74$$

Test plot as follows:

## 7.2.2 Spurious Emissions

### Measurement data:

#### 9 kHz ~ 30 MHz

The low frequency, which started from 9 kHz to 30 MHz, was pre-scanned and the result which was 20 dB lower than the limit line per 15.31(o) was not reported.

#### Below 1GHz:

2. *Average value = Peak value + Duty cycle factor*

## 7.3 20dB Occupy Bandwidth

|                   |                                                                                                                                                                                                                                                                                                                             |
|-------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Test Requirement: | FCC Part15 C Section 15.231 (c)                                                                                                                                                                                                                                                                                             |
| Test Method:      | ANSI C63.10:2013                                                                                                                                                                                                                                                                                                            |
| Limit:            | The bandwidth of the emission shall be no wider than 0.25% of the center frequency for devices operating above 70 MHz and below 900MHz. For devices operating above 900 MHz, the emission shall be no wider than 0.5% of the center frequency. Bandwidth is determined at the points 20 dB down from the modulated carrier. |
| Test setup:       |  <p>The diagram illustrates the test setup. A Spectrum Analyzer is connected via a red cable to an E.U.T. (Equipment Under Test). Both are placed on a Non-Conducted Table. Below the table is a Ground Reference Plane.</p>             |
| Test Instruments: | Refer to section 6.0 for details                                                                                                                                                                                                                                                                                            |
| Test mode:        | Refer to section 5.2 for details                                                                                                                                                                                                                                                                                            |
| Test results:     | Pass                                                                                                                                                                                                                                                                                                                        |

### Measurement Data

| Test Frequency (MHz) | 20dB bandwidth (kHz) | Limit (MHz) | Result |
|----------------------|----------------------|-------------|--------|
| 433.92               | 82.10                | 1.0848      | Pass   |

Note: Limit= Fundamental frequency×0.25%

$433.92 \times 0.25\% = 1.0848\text{MHz}$

Test plot as follows:

## 7.4 Deactivation Testing

|                   |                                                                                    |
|-------------------|------------------------------------------------------------------------------------|
| Test Requirement: | FCC Part15 C Section 15.231 (a)(2)                                                 |
| Test Method:      | ANSI C63.10:2013                                                                   |
| Receiver setup:   | RBW=1MHz, VBW=1MHz, span=0Hz, detector: Peak                                       |
| Limit:            | Not more than 5 seconds                                                            |
| Test setup:       |  |
| Test Instruments: | Refer to section 6.0 for details                                                   |
| Test mode:        | Refer to section 5.2 for details                                                   |
| Test results:     | Pass                                                                               |

### Measurement data:

| Frequency (MHz) | Duration of each TX (ms) | Limit (second) | Result |
|-----------------|--------------------------|----------------|--------|
| 433.92          | 248.5                    | <5.0           | Pass   |
