Solder Board-Component View 4	 A photograph of a small green printed circuit board (PCB) component, identified as a solder board component in View 4. The component is rectangular and features a gold-colored connector on one end. It is positioned on a blue textured surface. Two metal rulers are placed around the component for scale: one vertically on the left showing millimeter markings from 1 to 12, and one horizontally at the bottom showing centimeter markings from 1 to 20.
Solder Board-Component View 5	 A photograph of the same green PCB component, identified as a solder board component in View 5. This view shows the component from a different angle, highlighting a thin wire or lead extending from one side. It is placed on the same blue textured surface. Two metal rulers are used for scale: one vertically on the left showing millimeter markings from 1 to 16, and one horizontally at the bottom showing centimeter markings from 1 to 23.

EUT Housing and Board View 1	 A photograph showing two white, rectangular EUT housings and a printed circuit board (PCB) with various electronic components and wires. The components are laid out on a blue textured surface next to a metal ruler for scale. The ruler has markings in inches (0 to 12) and centimeters (0 to 30).
Solder Board-Component View 1	 A close-up photograph of a printed circuit board (PCB) with various electronic components, including a yellow capacitor, red resistors, and a small integrated circuit. The board is laid out on a blue textured surface next to a metal ruler for scale. The ruler has markings in inches (0 to 12) and centimeters (0 to 30).

Solder Board-Component View 2	 A photograph showing a small green printed circuit board (PCB) component with various electronic components and solder joints. The component is placed on a blue textured surface next to a metal ruler for scale. The ruler has markings in centimeters (0 to 34) and millimeters (0 to 23). The component is oriented horizontally, and its length is approximately 18 cm.
Solder Board-Component View 3	 A photograph showing the same green PCB component from a different angle, likely the underside. It is placed on the same blue textured surface next to a metal ruler for scale. The ruler has markings in centimeters (0 to 28) and millimeters (0 to 18). The component is oriented horizontally, and its length is approximately 8 cm.

Solder Board-Component View 4	 A photograph of a small green printed circuit board (PCB) component, labeled '20450P 2045013', mounted on a blue textured surface. The component is rectangular with two gold-colored pins extending from one end. A metal ruler is placed vertically to the left of the component, showing a scale from 1 to 18 cm. Another metal ruler is placed horizontally below the component, showing a scale from 1 to 28 cm.
Solder Board-Component View 5	 A photograph of the same green PCB component from a different angle, showing its profile. A thin, curved wire is attached to the top of the component. A metal ruler is placed vertically to the left, showing a scale from 1 to 22 cm. Another metal ruler is placed horizontally below, showing a scale from 1 to 32 cm.

Solder Board-Component View 6	 A photograph showing a small green electronic component with a thin wire attached, placed on a blue textured surface. A metal ruler is positioned vertically to the left of the component, showing measurements from 1 to 16 cm. A horizontal ruler is placed below the component, showing measurements from 1 to 26 cm.
Antenna View	 A photograph showing the same green electronic component and wire as in the previous view. A red rectangular box highlights the wire and the component. A red line points from the text "2.4GHz Antenna" in a red-bordered box to the wire. A metal ruler is positioned vertically to the left of the component, showing measurements from 1 to 16 cm. A horizontal ruler is placed below the component, showing measurements from 1 to 23 cm.
