Circuit Description

Q1 is the 49.86 MHz crystal oscillator drives the base of Q3 the final/ buffer amplifier. Summed into the same base (Q3) is the modulation provided by IC1. The output of Q3 has the matching network consisting of L2, C1, and C2 that limit the harmonic content and effect the proper coupling of the antenna to the output stage.

Antenna, Ground, and Power Source

The antenna consists of a 70cm long telescoping chrome over brass tubing. There is no external ground connection. The ground is only that of the printed circuit board. Electric current is supplied by a 9 Volt primary storage cell.
