Circuit Description

Q2 the 27.145 MHz crystal oscillator drives the base of Q1 the final/ buffer amplifier. Summed into the same base (Q1) is the modulation provided by IC1. The output of Q1 has the matching network consisting of T1, L1, L2, C1, C2, and C3 that limit the harmonic content and effect the proper coupling of the antenna to the output stage.

Antenna, Ground, and Power Source.

The antenna consists of a 55cm long telescoping chrome over brass tubing. There is no external ground connection. The ground is only that of the printed circuit board. Electric current is supplied by 1pc 9Volt primary storage cell.
