W56H Package Contents

W56H Handset  USB Charger Cradle  Belt Clip  Power Adapter

Rechargeable Battery  Quick Start Guide  Handset Protective Case (Optional)

Note: We recommend that you use the accessories provided or approved by Yealink. The use of unapproved third-party accessories may result in reduced performance.
1. Connect the base station power and the network using Method a or Method b.
   
   a. AC Power Option
   
   b. PoE (Power over Ethernet) Option

Note: • If you choose Method a, use Yealink supplied power adapter (5V/600mA). A third-party power adapter may damage the base station.
• If you choose Method b, you do not need to connect the power adapter. Make sure the hub/switch is PoE-compliant.

2a. (Desktop Installation) Attach and remove the base stand.

Attach the Base Stand

Remove the Base Stand

Align the snap-fits with the corresponding holes and push forward, snapping them into the holes.

Remove the snap-fits from the holes horizontally.
2b. (Wall-Mount Installation) Attach the base station.

3. Insert the battery into the handset.

4. Attach the Belt Clip.

5. (Optional) Mount the charger cradle to the wall.
6. Connect the charger cradle and charge the handset.

Note: Use Yealink supplied power adapter (5V/600mA). A third-party power adapter may damage the handset.
- Check the charging status on the top right corner of the LCD screen.

Getting Started

Shortcuts
Shortcut keys help you quickly access to frequently used phone features. Check the default shortcut keys below:

1. Press the left soft key to access the call history.
2. Press the right soft key to check the line status.
3. Press ▲ to place an internal call.
4. Press ◀ to decrease the ringer volume.
5. Press ► to increase the ringer volume.
6. Press ◀ to access the directory.

Entering and Editing Data

- Press [#] one or more times to switch among different input modes or enter “#”.
- Press [*] to select the special characters or enter “*”.
- Press a digit key one or more times to enter the desired character or digit.
- Press the Del soft key to delete entered characters.
- Press the Save soft key to accept the change or ✖ to cancel.
Network Settings

You can configure the base station to obtain network settings in one of the following ways:

**DHCP**

By default, the base station attempts to contact a DHCP server in your network to obtain the valid network settings, e.g., IP address, subnet mask, gateway address and DNS address.

Handset Registration

You can register up to 8 handsets to one W60B base station. Each handset can be registered to 4 different base stations.

When the handset LCD screen prompts “Press base paging 2s then press Reg.”, long press on the base station till the registration LED flashes. There are two methods to register a new handset:

**Easy Registration:**

1. Press the Reg soft key on the handset to register quickly.

**Normal Registration:**

1. Press the OK soft key on the handset, and then select Register Handset.
2. Select the desired base station and then press the OK soft key. The handset begins searching the base station.
3. Press the OK soft key after searching a base station successfully.
4. Enter the base station PIN (default: 0000), and then press the Done soft key to complete registration.

To register to multiple base stations, press the OK to enter the main menu, and select Settings->Registration->Register Handset, then repeat steps 2-4.

Note: If the handset is registered to the base station successfully, the handset LCD screen prompts “Handset Subscribed” and “Base NO.” (last 4 characters indicate the base station’s MAC address).
- If the handset LCD screen prompts “Searching for Base”, check if your base station is powered on or not.
Static
If the base station cannot contact a DHCP server for any reason, you need to configure the IP address, subnet mask, gateway address, primary DNS address and secondary DNS address for the base station manually.

To configure the network parameters for the base station manually:
1. Press the OK key to enter the main menu, and then select Settings -> System Settings -> Network (default PIN: 0000) -> Basic.
2. Select the desired IP address mode from the IP Mode field.
3. Press ▼ to select the corresponding IP address mode.
4. Make the desired changes.
5. Press the Save soft key to accept the change.

Turning Handset On/Off
To turn the handset on, do one of the following:
• Press 📲, then the LCD screen lights up.
• Place the handset in the charger cradle. The handset will be turned on automatically.

To turn the handset off:
Long press 📲 to turn the handset off.

Locking/Unlocking Keypad
• Long press # when the handset is idle to lock the keypad.
• Long press # again to unlock the keypad.

Silent Mode
• Long press * when the handset is idle to switch the silent mode to On.
• Long press * again to switch the silent mode to Off.
Handset Settings

1. Press the OK key to enter the main menu, and then select Settings -> Telephony -> Speed Dial.
2. Press ▲ or ▼ to highlight the desired digit key, and then press the Assign soft key.
3. Press ▲ or ▼ to highlight the desired entry, and then press the OK soft key.

   If both the office number and mobile number are stored, press ▲ or ▼ to highlight the desired number, and then press the OK soft key again.

Basic Call Features

Placing Calls

To place a call directly:

1. Do one of the following:
   - Enter the desired number when the handset is idle.
   - Press   to enter the pre-dialing screen.
     Enter the desired number using the keypad.
   If there are multiple lines assigned to your handset as outgoing lines, press the Line soft key to select the desired line. If you do not select a line, the handset uses the default outgoing line to dial out.
2. Press  ,   or   to dial out.

To place a call from the local directory:

1. Press ▼ when the handset is idle.
2. Press ▲ or ▼ to highlight the desired entry, and then press   or   to dial out using the default line.

   If multiple numbers for the contact are stored, press ▲ or ▼ to highlight the desired number, and then press   or   again to dial out using the default line.

To place a call from the call history:

1. Press the History soft key when the handset is idle, and then select the desired call history list.
2. Press ▲ or ▼ to highlight the desired entry, and then press   or   to dial out using the default line.

To place a call from the redial list:

1. Press   when the handset is idle.
2. Press ▲ or ▼ to highlight the desired entry, and then press   or  .
To place a call using the speed dial key:
Long press the speed dial key to call the preset number directly.

Answering Calls
To answer a call, do one of the following:
- Press the **Accept** soft key.
- Press `1`
- Press `2`
- Press `OK`

Note: You can ignore an incoming call by pressing the **Silence** soft key or reject an incoming call by pressing `@`

Ending Calls
Press `@`

Call Mute
- Press `M` during a call to mute the call.
- Press `M` again to un-mute the call.

Call Hold and Resume
To place a call on hold:
Press the **Options** soft key during a call, and then select **Hold**.

To resume a call, do one of the following:
- If there is only a call on hold, press the **Resume** soft key.
- If there are two calls on hold, press the **Resume** soft key to resume the current call.
  - Press the **Swap** soft key to swap between calls.

Call Transfer
You can transfer a call in the following ways:

Blind Transfer
1. Press the **Options** soft key during a call, and then select **Transfer**.
2. Enter the number you want to transfer the call to.
3. Press the **Transfer** soft key.
Semi-Attended Transfer

1. Press the Options soft key during a call, and then select Transfer.
2. Enter the number you want to transfer the call to.
3. Press \[ \text{\textit{or \textcircled{}} or \textcircled{}} \] to dial out.
4. Press the Transfer soft key when you hear the ring-back tone.

Attended Transfer

1. Press the Options soft key during a call, and then select Transfer.
2. Enter the number you want to transfer the call to.
3. Press \[ \text{\textit{or \textcircled{}} or \textcircled{}} \] to dial out.
4. Press the Transfer soft key after the call is answered.

Call Forward

To enable the call forward feature on a specific line:

1. Press the OK key to enter the main menu, and then select Call Features-> Call Forward.
2. Press \[ \text{\textup{\textcircled{}} or \textcircled{}} \] to highlight the desired line, and then press the OK soft key.
3. Press \[ \text{\textup{\textcircled{}} or \textcircled{}} \] to highlight the desired forwarding type, and then press the OK soft key.
   - Always----Incoming calls are forwarded immediately.
   - Busy----Incoming calls are forwarded when the line is busy.
   - No Answer----Incoming calls are forwarded if not answered after a period of time.
4. Select Enabled from the Status field.
5. Enter the number you want to forward the incoming calls to in the Target field.
   - For No Answer Forward, press \[ \text{\textup{\textcircled{}} or \textcircled{}} \] to select the desired ring time to wait before forwarding in the After Ring Time field.
6. Press the Save soft key to accept the change.
About Yealink

Yealink (Stock Code: 300628) is a global leading unified communication (UC) terminal solution provider that primarily offers video conferencing systems and voice communication solutions. Founded in 2001, Yealink leverages its independent research and development and innovation to pursue its core mission: “Easy collaboration, high productivity.” The company’s high-quality UC terminal solutions enhance the work efficiency and competitive advantages of its customers in over 100 countries. Yealink is the world’s second-largest SIP phone provider and is number one in the China market.
