The material above contains trade secrets and proprietary information not customarily released to the public.

The public disclosure of these matters could be harmful to the Applicant and provide unjustified benefits to its competitors. The Applicant understands that, pursuant to Rule 0.457(d)(1)(ii), disclosure of this Application and all accompanying materials will not be made before the date of the Grant for this Application. Internal photos, especially those of products, prototypes, or any confidential materials, are strictly controlled to prevent unauthorized access or public disclosure. This is achieved through confidentiality agreements, restricted sharing, and secure storage and transfer protocols.

For products that can only be serviced by designated professional technicians, public access is restricted. Access to the product's internal components is limited by sealing compartments with epoxy. Service manuals, schematics, and technical documentation are made available only to professionals under a non-disclosure agreement (NDA). The NDA will bind the final user of the device to the same confidentiality obligations as the parties involved in the transaction. By purchasing or using the device, the final user agrees to be bound by the terms and conditions outlined in the NDA, ensuring the protection of confidential information and intellectual property associated with the device.

Sincerely,
