

- High Channel:

The peak above the limit is the carrier frequency.

- **Pi/4-DQPSK modulation (2DH5):**

- Low Channel:

The peak above the limit is the carrier frequency.

- Middle Channel:

The peak above the limit is the carrier frequency.

- High Channel:

The peak above the limit is the carrier frequency.

- **8-DPSK modulation (3DH5):**

- Low Channel:

The peak above the limit is the carrier frequency.

- Middle Channel:

The peak above the limit is the carrier frequency.

- High Channel:

The peak above the limit is the carrier frequency.

FREQUENCY RANGE 3 - 17 GHz:

• GFSK modulation (DH5)

- Low Channel:

- Middle Channel:

- High Channel:

• Pi/4-DQPSK modulation (2DH5):

- Low Channel:

- Middle Channel:

- High Channel:
