American Certification Body, Inc.
313 Park Avenue
Suite 300
Falls Church, VA 22046

To Whom It May Concern:

Farpointe Data, Inc. certifies that the CSM-200 is an Access Control Module that achieves its access control functions through two interfaces:

1) HF (NFC) interface at 13.56 MHz, and 2) Bluetooth LE interface (BLE) at 2.4 GHz.
The NFC and BLE interfaces do not operate simultaneously and were tested separately.

The Dormakaba E7900 Electronic Door Lock was the host for the CSM-200 NFC and BLE testing. The host contains a Zigbee transmitter, FCC ID: Q8S515123, IC: 4652A-515123. The Zigbee transmitter was not active during the NFC and BLE testing.

At times, the host's Zigbee TX and the module's BLE do transmit simultaneously. The Zigbee TX and the module's NFC also transmit simultaneously at times. The three transmitters do not transmit simultaneously.

Separate collocation testing was conducted accordingly; compliance was demonstrated and recorded.

Regards,

Paul Saldin
