United States of America

SUBJECT: FREQUENCY EXTENSION DECLARATION OF CHANGES FOR TCJ-M4DBDAUU

To Whom It May Concern:

This Declaration of Changes letter is submitted to formally describe the Class 2 modifications which comprise two additional configurations of TCJ-M4DBDAUU corresponding to the replacement of sub-band preselection passive components within the same original UHF band of operation. These additional sub-bands are now being submitted for certification due to a market strategy update.

The changes made to the sample unit correspond to replacement of passive components with frequency response (mainly filters) on Analog Interface Modules (AIC) and Power Amplifier Module (PAM) without the need of requiring changes in the PCB or in the module's enclosure.

This device complies with 47 CFR Part 90.203(e) in that the operator cannot program and transmit on frequencies, other than those programmed by the manufacturer, service or maintenance personnel, using the equipment's external operation controls.

It is noted that the FCC rules would be violated if this radio equipment is programmed to operate on frequencies outside of FCC Part 90 Frequency Bands for users other than the Federal Government.

Yours sincerely,

Victor Bermudez
