

Features:

- Full Function Radio Control.
- 2.4GHz Frequency – allows up to 6 vehicles to run at the same time.
- Wheel Alignment – Adjust the wheel alignment located on bottom of vehicle between front wheels.
- Internal Lithium battery with USB charging cord.

Features – Operated by the transmitter:

1. Move Left joystick up to move the vehicle FORWARD.
2. Move Left joystick down to move the vehicle REVERSE.
3. Move Right joystick left or right to move vehicle LEFT or RIGHT.
4. This vehicle has working headlights and brake lights.
When driving forward or reverse the lights will turn on.
When stopping in forward or reverse the brake lights will light up for several seconds.
5. This vehicle has sounds. In sound mode the sounds will continue until MUTE button is pressed or vehicle is turned off.
Press START button on controller to hear engine sounds.
Press MUTE button again to stop/mute sounds.

Batteries/Recharging Unit (Included):

Transmitter – 2 “AA” batteries.

Vehicle – Internal rechargeable Lithium Ion Battery with USB Charging Cord.

Charge by USB:

1. Locate the ON/OFF Switch on underside of vehicle and switch to the OFF position.
2. Open the USB Cord Compartment cover located on the underside of the vehicle.
Use care when extending cord. Do not pull or tug on cord.
3. Plug USB cord into any computer.
4. Charging status light will be solid red while battery is charging. When charging is complete, light will turn off.
5. Return cord and replace compartment cover.

The Transmitter:

1. Locate and remove screw and slide to open battery compartment cover on transmitter.
2. Insert 2 “AA” batteries in the battery compartment. Be sure the (+) and (–) are properly matched.
3. Replace the battery cover and replace the screw.
4. The transmitter will automatically sync with the vehicle.

Note: When replacing batteries:

- Use Alkaline batteries only.
- Do not mix old and new batteries.
- Do not mix Alkaline, Standard and Rechargeable batteries.

The Vehicle:

Locate the ON/OFF switch on the underside of the vehicle, near USB Cord Compartment. Switch to the ON position. The vehicle is now ready for use.

IMPORTANT!

The internal Lithium Ion battery pack is only PARTIALLY CHARGED prior to shipment and it is recommended the battery be fully charged before first use.

Caution:

Chargers used with the toy are to be regularly examined for damage to the cord, plug, enclosure and other parts, and that, in the event of such damage, the toy must not be used with this charger cable until the damage has been repaired.

Notes:

1. Operate the vehicle within 80-100 feet (25-30 meters) range.
2. Switch off the toy when not in use.
3. Remove “AA” batteries in transmitter when not in use for long periods.
4. If vehicle is not functioning properly, make sure batteries in transmitter are fresh, vehicle is fully charged.
5. Adult supervision recommended.
6. Please remove all packaging attachments before giving this toy to your child.
7. Do not insert the USB cable into electrical socket outlets.
8. Do not use the included USB cable for purpose other than recharging this vehicle.
9. USB Power Adapter is not included.
10. To protect the battery and prolong its life, do not overcharge the vehicle.

The reception performance may be affected under a strong interference disturbance environment.

This product would not perform normally under a strong electrostatic environment.

The instructions must be kept since it contains important information.

TROUBLE SHOOTING

Problem- Vehicle does not move or moves slowly.

- Has the rechargeable Battery been fully charged?
- Make certain the battery connectors are properly connected and the locking tab is fully latched.
- Make certain there are fresh alkaline batteries in the transmitter and that they have been installed in the correct position.
- Are the (+) and (–) markings on the alkaline batteries in the same position as the (+) and (–) markings in the Transmitter Battery Compartment?
- Make certain that the vehicle ON/OFF switch is in the “ON” position.

Problem - Vehicle moves by itself or exhibits reduced range from the transmitter.

- Make certain there is no outside radio interference in your area. The best way to test this is to take the vehicle as far away from radio towers, electrical lines or tall buildings as possible to ensure no further radio interference will occur.

FCC CAUTION:

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

NOTE:

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.
