FCC ID: THVSMARTSAMPLE

Subject: Declaration for certified accessories without user manual

Dear Sirs,

The products of Mettler-Toledo GmbH with the above stated FCC IDs are additional accessories dedicated for integration/connection into the "XPE analytical balances" manufactured and marketed by Mettler-Toledo GmbH.

Those accessories do not have any functionalities without being connected to the balance and will be solely built in by professional staff; therefore there is no individual user manual for each individual component.

Consequently, the necessary information describing those accessories and their functions will be included in the main user manual of the final end product (balances), including clear instructions on how end users can find and/or access the FCC IDs.

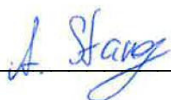

The following statements as per CFR 47, §15.21 and §15.19(a)(3) are included in a prominent location of the user's manual:

"Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment."

This device complies with Industry Canada licence-exempt RSS standard(s) and part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause interference, and (2) this device must accept any interference, including interference that may cause undesired operation of the device.

If you have any questions, please feel free to contact me.

Yours sincerely, in the name of Mettler-Toledo GmbH,
Anton Stang

Signatory
