Federal Communications Commission
Via: Electronic Filing

Attention: Authorization & Evaluation Division

Applicant: CALSENSE
Equipment: MURS Transceiver
FCC ID: TJ2-RRE
FCC Rules: Modular, 95J

Gentlemen:

On behalf of the Applicant the following statement on Modular Approval is provided.

1. The modular transmitter has its own RF shielding. This ensures that the module does not have to rely upon the shielding provided by the device into which it is installed

2. The TJ2-RRE has buffered modulation/data inputs to ensure that the module will comply with modular requirements.

3. The module contains its own on-board power supply regulation.

4. The antenna is external to the module using a unique connector.

5. The modular transmitter was tested in a stand-alone configuration.

6. The modular is labeled with its own FCC ID number, and, as the FCC ID will not visible when the module is installed inside another device, an exterior label will be used. An example label is provided with the application.

7. The device complies with Parts 15B, and 95J of the FCC Rules. A copy of instructions, specific to the Rule Parts, is included in the application for equipment authorization.

8. The module complies with the applicable RF exposure requirements and an MPE Assessment (47 CFR 1.1310) is included with the filing. A 20cm distance is specified for a zero dBd antenna.
