RE: TKHSP102 label location

TO WHOM IT MAY CONCERN

Identification label of the equipment TKHSP102 is located in the battery compartment:

Per Sec. 2.925 (Identification of the equipment):
...
(d) In order to validate the grant of equipment authorization, the nameplate or label shall be permanently affixed to the equipment and shall be readily visible to the purchaser at the time of purchase.

(1) As used here, permanently affixed means that the required nameplate data is etched, engraved, stamped, indelibly printed, or otherwise permanently marked on a permanently attached part of the equipment enclosure. Alternatively, the required information may be permanently marked on a nameplate of metal, plastic, or other material fastened to the equipment enclosure by welding, riveting, etc., or with a permanent adhesive. Such a nameplate must be able to last the expected lifetime of the equipment in the environment in which the equipment will be operated and must not be readily detachable.

(2) As used here, readily visible means that the nameplate or nameplate data must be visible from the outside of the equipment enclosure. It is preferable that it be visible at all times during normal installation or use, but this is not a prerequisite for grant of equipment authorization.

...

The equipment TKHSP102 will be marketed with the battery removed, not mounted together with the equipment, the customer will need to place the battery on the battery compartment. So at the time of purchase the customer will clearly see and read the identification label.

If you have any questions, please feel free to contact me at the address shown below.

Sincerely,

Name: **Rafael Abad Cano**
