Dear Helen:

Question #1: This device is used in mobile configuration. But the test report does not include MPE calculation. Please update the test report.

ANS:The test report had been revised, please see attachment.

Question #2: This is for your information. FCC ID consists of Grantee code and Product code. For this application, "TLZ" is the grantee code, when you input product code, please enter "-GA200" only, not "TLZ-GA200", otherwise, the FCC ID will be "TLZTLZ-GA200".

ANS: Thank you for your information, I'll be noticed in the future.
