

EXHIBIT 4 - TEST SETUP PHOTOGRAPHS

Conducted Emission Test Setup	 A photograph showing a conducted emission test setup. On the left, a piece of electronic equipment (likely a spectrum analyzer or power meter) sits on a wooden table. A red cable runs from the equipment to a power supply unit on the floor. To the right, another wooden table holds a black electronic device (possibly a test fixture or antenna) connected to the power supply. The background is a plain wall with a power outlet.
Radiation Emission Test Setup (Below 30MHz)	 A photograph showing a radiation emission test setup. The room is lined with white, square-shaped electromagnetic shielding tiles. In the center, a white electronic device sits on a small white stand. A metal frame structure is visible in the foreground, and a yellow and black striped caution tape is on the floor. The floor is made of large, light-colored tiles.

Radiation Emission Test Setup (30MHz to 1GHz)	 A photograph of a radiation emission test setup for the 30MHz to 1GHz frequency range. The test chamber is lined with white, square-shaped anechoic absorbers. A white, rectangular test fixture is positioned on a circular turntable in the center of the chamber. The floor is marked with yellow and black safety lines. A metal railing is visible on the right side of the chamber.
Radiation Emission Test Setup (1GHz to 18GHz)	 A photograph of a radiation emission test setup for the 1GHz to 18GHz frequency range. The test chamber is lined with white, square-shaped anechoic absorbers. A white, rectangular test fixture is positioned on a circular turntable in the center of the chamber. The floor is marked with yellow and black safety lines. A red object is visible on the right side of the chamber.

**Radiation Emission Test
Setup (Above 18GHz)**
