

Long term confidentiality request for TMA family products

Dear Sir or Madam,

This letter serves as an official request for confidentiality under sections 0.457 and 0.459 of CFR 47. We have requested that the following documents required to be submitted with this application be permanently withheld from public review.

The features are :

- LC2 block diagram (schematics + gerbers)
- TMx block diagram (schematics + gerbers)
- LC2 Build of materials
- TMx Build of materials
- Tune-up procedure of TMA
- Technical description of TMA

These documents contain detailed system and equipment descriptions and related information about the product, which manufacturer/applicant considers to be proprietary, confidential, and a custom design and otherwise, would not release to the general public. Since this design is a basis from which future technological products will evolve, manufacturer/applicant feels that this information would be of benefit to its competitors, and that the disclosure of the information in these documents would give our competitors an unfair advantage in the market.

Please contact me if there is any information you may need.

Sincerely,

Mr. André Van den Bogaert
