RE: Professional Installation Requirement for Exalt Communications Inc.
EX-2.4i (FCC ID: TTM-1Ø2P4ØI)

Dear Sirs/Madam,

This document is provided to describe the need for the EX-2.4i to be professionally installed, and, as such, is exempt from the antenna restrictions of FCC Part 15.203.

Use

The EX-2.4i is a fixed permanent or temporary outdoor point-to-point microwave radio used for joining industrial and commercial locations to connect voice (TDM) and/or data (Ethernet) circuits. The EX-2.4i is mounted in a telecommunications rack or environmental cabinet, and the associated antennas are mounted on towers or specifically-constructed antenna masts on buildings or other structures.

Installation

The engineering and installation of fixed microwave systems requires specific expertise in microwave transmission planning and engineering, antenna installation, antenna alignment, grounding, lightning protection, transmission line installation and site construction. Furthermore, the connection of TDM circuits requires specific expertise in the area of telecommunications configuration.

The Installation and Maintenance Manual specifically states that the products must be professionally installed, and provides the details for proper output power setting in accordance to the antenna and transmission system deployed. Output power setting may only be accessed by the system administrator, and not by the user.

Marketing

Exalt sells the EX-2.4i through an exclusive group of telecommunications distributors who are chosen by and under contract to Exalt Communications. These distributors sell to Value Added Resellers and Telecommunications companies that are specifically qualified in the area of fixed microwave engineering and installation, and Exalt monitors the sale of every system. These

systems are not marketed and sold to the general public, not sold in retail outlets or by mail order.

Customers will purchase the antennas and transmission system from these same distributors. A list of acceptable antennas is listed in the Installation and Maintenance Manual.

If you have any questions, please do not hesitate to contact me.

Sincerely,

A handwritten signature in dark ink, appearing to read "Ken Ruppel", with a stylized, cursive script.
