

To whom it may concern

Product marking on B-F2 hearing aid.

Brand name “Widex” is printed on the shell

Other product identification is laser engraved on marking plate

The B-F2 model is available in 4 different feature levels “440, 330, 220, 110”.

Feature level 440 has the highest level of functionality while level 330, 220 and 110 have various audiological features disabled or restricted by software switch limitation.

Widex A/S hereby declare that all B-F2 feature level variants are identical in all other aspects, hereunder same hardware and therefore have identical electrical/electronic characteristics including EMC, Electrical safety and Radio spectrum performance and therefore constitutes the same model. Conformance testing is done on feature level 440 test units.

Sincerely,

20 April 2016,

Date,

Hans-Otto Bindeballe, Global Regulatory Affairs
