FCC Warning Statement

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radiocommunications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This device complies with Part 15 of the FCC rules. Operation is subject to the following two conditions: 1) this device may not cause harmful interference, and 2) this device must accept any interference received, including interference that may cause undesired operation.

CONFIGURING THE GAMSPEED GAMING MOUSE

The following features are available after actuation software installation:

Mouse Sensitivity:
Adjustment of Mouse sensitivity level of wireless mouse that the higher level cause the cursor moving more sensitive.

Mouse Scroll Speed:
Adjustment of the scrolling speed of the mouse wheel.
Double-click speed
Adjustment of the speed required to register a double-click. The higher double-click speed that the shorter interval required between double clicks.

DPI:
5 DPI adjustment setting level. The DPI range is from 100 to 16000. The DPI adjustable range is 100. Adjustment of DPI level that the higher DPI causes the cursor movement more precise.

USB Polling Rate:
The information that the mouse transfers to the computer every second. Sets the polling rate from 125Hz(8ms), 250Hz(4ms), 500Hz(2ms) to 1000Hz(1ms). The higher polling rate cause more precise mouse movement.

Macro

This function is to combine multiple keys into one button of the mouse.

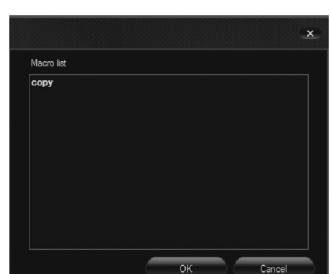

The Flow of Macro

- 1. Create a new macro that click one 'New macro' button.
- 2. Create a name for this macro.
- 3. Click on the button 'Start record'.
- 4. Press the keys one by one on your keyboard. For example COPY, press button 'Ctrl' and 'C'.
- 5. Click on the same button as start record to stop record.
- 6. Click on 'save' button for saving your action.
- 7. Switch to the Main page to choose one of the mouse buttons and click on it. For example, You choose button 1 to reprogram it. Then you will see the page.

8. Click on the 'Marco' button in the list. Then it will show on a Macro list.

9. Chose the Macro action that you want to program.

Light options
