

Clarification statement from Technical contact @ Comark Ltd

Internal Power Supply:

We only have 60 of the old PSU's after which the new one will be the only one available, the only part number I can obtain from morex is:

SH-6080

The parts list is the same as before with no changes.

External Power Supply:

The PSU will always supplied with the equipment and it is being changed because the old one has gone obsolete.

If you have any other questions give me a shout.

Regards

Paul Morrison.
