Subject: RE: [EXTERNAL]: 回复: Urgently: Is Industrial 4G router in the new covered list on 23, Mar, 2026?

Hi Jessy,

The Covered List restrictions do not apply to commercial or industrial routers.

The Office of Engineering and Technology manages the equipment authorization program. If you have questions about the certification process, please submit a request via the [OET Inquiry Form](#).

Dear Rebecca,

How are you?

For my FCC inquiry and email checking, may I know is there any feedback?

For this ODM project, we started from May, 2025; And we started different certs on Dec, 2025.

We submitted the FCC request before the cover list was released;
Now we are waiting in two weeks for this inquiry also.
May I know when we are expecting to get your reply?

Thanks and waiting for your news!

Best Regards!

Dear Rebecca, Dear Chris

How are you?

I sent a KDB inquiry to FCC for the industrial ODM router for Pronto Networks, Inc.

We applied for the certification from Jan, now it is stucked as new covered list.
As I know the KDB inquiry will be nearly to 7`15 days, which is very long time.

May I know is there any possible to get some earlier reply?

Inquiry Tracking Number: 420333
Date of Original Submission: 03/27/2026
Date of Submission: 03/27/2026
[Inquiry Details on 03/27/2026:](#)

Inquiry:
Dear FCC,

We are applying the FCC for an industrial ODM router for Pronto Network, Inc in USA, the model is PC64, FCC ID:TVV-PC64.
PC64 is an industrial ODM router for Pronto Network, Inc in USA, it's made in China.

Please check attached User Manual of PC64, Certification statementt, specification,BOM, Cloud Controller User Manual for Pronto industrial Foreign-Made Router, the router is made in China.

Is Commerial/Industrial Foreign-Made Router on the Covered List?

1# All the document sent by the end clients. Their product is not for use in households, but is for commercial and industrial purposes.

2# Regarding software, which is Pronto own software and is operated through the cloud platform. Only Pronto can access it and view the content, the foreign made manufacturer cannot make any settings. The client has provided an explanation for this as well.

3# The BOM can show that PC64 with metal housing, PoE output support, 48V power input, has many protective measures added to the board, it is 70 degreen working temperature required, being of industrial-grade quality and applications.

Best Regards!

Dear Rebecca, Dear Chris,

How are you?

This is Jessy from Shenzhen Kings IoT, we are manufacturing one industrial 4G router for Pronto Networks, Inc, 1966 Tice, Valley Boulevard#411, Walnut Creek, CA, 94595.

We are getting the FCC certification, the FCC ID is TVV-PC64. But stopped as the new covered list on 23, Mar, 2026, may I know is that Industrial router for car/boat, SMB wireless AP for hotel/school will be in the list? Attach the product spec for checking. And Pronto showed that their product will be used in B2B deployment also.

If not in the list, may I know is there any extra documents are required?

**Re: FCC Covered List – Router Definition Certification Applicant: F
PC64 / FCC ID application in progress**

Pronto Networks certifies that the above-referenced device(s) are **not "covered"** by the FCC's Covered List as updated March 23, 2026 (DA 26-278).

Specifically, the March 20, 2026, National Security Determination defines the equipment category — as **"consumer-grade networking devices that are for residential use and can be installed by the customer"** (per NIST IR 8499 Rev. 1).

Pronto Networks' device(s) are **commercial/enterprise-grade** networking devices marketed exclusively for B2B deployment in hospitality / healthcare / retail / industrial / government / etc. They are **not** primarily intended for residential use and do not meet the NIST IR 8499 Rev. 1 definition of a consumer-grade router. Pronto develops its own firmware and supporting cloud software.

Thanks and waiting for your news!

Best Regards!

Jessy
