Cover Letter: C2PC to FCC Application TXTDTECT200C

To whom it may concern,

We, Robert Bosch Tool Corporation, request a Class 2 Permissive Change to FCC ID: TXTDTECT200C. The purpose of this Class 2 Permissive Change is to add a new device, called D-tect18V-200-17C, to the D-tect 200C product family.

Compared to D-tect 200C, the D-tect18V-200-17C includes one additional mode to display the measured sensor data and supports the 18V battery pack instead of the 12V battery pack. All technical changes are further detailed in a separate document, as part of this application. As existing modes and sensor characteristics have not changed, the same FCC waiver conditions as for D-tect 200C apply and will be respected.

Sincerely yours,
