In re : Casio Hitachi Mobile Communications CO.,LTD.
FCC ID : TYKNX9200
Dual-mode CDMA Phone (CDMA/ PCS CDMA)
Part 22/24 Certification
Request for Confidentiality

Gentlemen :

In accordance with 0.459 of CFR 47, Casio Hitachi Mobile Communications CO., LTD. hereby requests confidentiality of the Block Diagrams attachment, Schematic Diagrams attachment, Operational Description attachment, and Part List/Tune-Up Procedure attachment for the above-referenced Certification application.

These documents contain detailed system and equipment description and related information about the product which Casio Hitachi Mobile Communications CO., LTD. considers to be proprietary, confidential, and a custom design and, otherwise, would not release to the general public. Since this design is a basis from which future technological products will evolve, Casio Hitachi Mobile Communications CO.,LTD. feels this information would be of benefit to its competitors, and that the disclosure of the information in these documents would give our competitors an unfair advantage in the market.

Sincerely Yours,

Tsujita yoshinori - Overseas Developments Manager

AFFIDAVIT FOR ESN PROTECTION OF CELLULAR MOBILE TELEPHONES

We hereby certify that the Dual-mode CDMA Phone (CDMA/ PCS CDMA) (FCC ID : TYKNX9200) is so designed that it complies with all the requirements for ESN protection specified in Section 22.919 of the FCC Rules.

a) The transmitter in service has a unique ESN.

b) The ESN host component is permanently attached to a main circuit board of the mobile transmitter and the integrity of the unit operating software cannot be altered. The ESN is plated from fraudulent contact and tampering. The ESN is encoded using multiplication by a polynomial and the ESN data programmed in the memory with other information.

c) The ESN is factory-set and cannot be altered, transferred, removed or otherwise able to be manipulated. Cellular mobile equipment is specifically designed such that any attempt to remove, tamper with, or change the ESN chip, its logic system, or firmware originally programmed by the manufacturer will render the mobile transmitter inoperative.

Sincerely Yours,

Tsujita yoshinori – Overseas Developments Manager
