5. SIP-based VoIP System Architecture

[Appendix] Hardware specifications of Callstick

Key hardware features

- USB 1.1 compatible
- Automatic program execution and termination using USB port (Autorun function)
- VOIP voice telephony service
- USB data storage function: 128MBytes (256M or above are also available)
- Enhanced sound quality by USB sound IC
- Call or music listening function via headset or earphone

Operating environment

- Windows 98/SE/ME, NT, 2000, XP (Drivers are needed for Windows 98/SE/ME)
- Pentium-III 300MHz or above
- RAM 32M or above
- USB 1.1

Major hardware part list

- Audio USB sound chip : UAC3556B / CM109 / CM108
- USB controller : AU9254A21+AU9386
- Flash memory : 128M (256M or above are also available)
- Buzzer, melody, LED
- Connector & Passive components
- Accessories : ear set, user manual, gift box, inner packing, packing bag

FCC NOTICE

THIS DEVICE COMPLIES WITH PART 15 OF THE FCC RULES.
OPERATION IS SUBJECT TO THE FOLLOWING TWO CONDITION:
(1) THIS DEVICE MAY NOT CAUSE HARMFUL INTERFERENCE, AND
(2) THIS DEVICE MUST ACCEPT ANY INTERFERENCE RECEIVED,
INCLUDING INTERFERENCE THAT MAY CAUSE UNDERSIRED
OPERATION.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communication. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures :

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

NOTE : The manufacturer is not responsible for any radio or TV interference caused by unauthorized modifications to this equipment. Such modifications could void the user's authority to operate the equipment.
