ACS TCB  
5015 B.U. Bowman Drive  
Buford, GA 30518

FCC: **U4A-MODBLE9052**

To Whom It May Concern:

**Assa Abloy**, is seeking limited module approval status.

| Modular Approval Requirement                                                                                                                                                                                                  | Yes | No |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|----|
| a) The radio elements must have the radio frequency circuitry shielded. Physical components and tuning capacitor(s) may be located external to the shield, but must be on the module assembly.                                |     | No |
| b) The module must have buffered modulation/data inputs to ensure that the device will comply with Part 15 requirements with any type of input signal.                                                                        |     | No |
| c) The module must contain power supply regulation on the module.                                                                                                                                                             |     | No |
| d) The module must contain a permanently attached antenna, or contain a unique antenna connector, and be marketed and operated only with specific antenna(s), per Sections 15.203, 15.204(b), 15.204(c), 15.212(a), 2.929(b). | Yes |    |
| e) The module must demonstrate compliance in a stand-alone configuration.                                                                                                                                                     |     | No |
| f) The module must be labeled with its permanently affixed FCC ID label, or use an electronic display (See KDB Publication 784748 about labeling requirements).                                                               | Yes |    |
| g) The module must comply with all specific rules applicable to the transmitter including all the conditions provided in the integration instructions by the grantee.                                                         | Yes |    |
| h) The module must comply with RF exposure requirements.                                                                                                                                                                      | Yes |    |

As a result of not being in full compliance it is requested that "Limited Modular Approval" be granted for the Model: BLE9052 Assembly: 52-9052 module for use within the host P1\P2\W11\IP1.

Sincerely,

Steven Pfalzgraf  
Product Development Engineer
