Re: FCC ID: U4A-YRHCPZW0LM

To Whom It May Concern:

The following application is submitted on behalf of our client, Assa Abloy Inc., for evaluation of their model YRMZW1-US for certification under FCC Part 15.249.

The YRMZW1-US is a 908.42 MHz low powered module that is powered from 4 AA batteries located inside of the lock housings. The YRMZW1-US is integrated into the following select remote controlled door locks and is used to remotely control different radio linked devices in the home that the door locks are associated with.

YRD210 Push Button Deadbolt Lock
YRD220 Touch Screen Deadbolt Lock
YRD240 Touch Screen Deadbolt w/o Cylinder Lock
YRT210 Push Button Lever Lock
YRT220 Touch Screen Lever Lock

The YRMZW1-US was evaluated in all host lock model variants in an orientation of typical installation per the aforementioned rules and was found to be in compliance.

Sincerely,

A handwritten signature in black ink that reads 'R. Sam Wismer'. The signature is written in a cursive, flowing style.
