1 What is Bluetooth?

1.1 Features of Bluetooth

- Objectives of Bluetooth : To Realize Wireless Communication for Short Distance with Low Power Consumption, High Reliability, and Low Cost.
- Frequency in Use: To Use ISM(Industrial, Scientific, Medical) Band which does not require any permission to use.
 - 2.400 – 2.4835 GHz, 79 channels
 - 2.465 – 2.4835 GHz, 23 channels (in France)
- Transmission Rate : 1Mbps ~ 3Mbps
- Transmission Output : 1mW (10m, Class2), 100mW (100m Class1)
- Network Configuration : Configured with Master and Slave relation. A Bluetooth unit shall allow simultaneous connections up to 7 devices (in case of ACL).
- Reliability : To Guarantee stable wireless communication even under severe noisy environment through adopting the technique of FHSS (Frequency Hopping Spread Spectrum).

1.2 Operation of Bluetooth

<Feature 1-1 Bluetooth Operation>

- Bluetooth operates based on the connection between "Master" and "Slave".
- Masters are simply supposed to do "Inquiry" and "Page". Slaves are supposed to do "Inquiry Scan" and "Page Scan".
- If a Master finds a Slave and so "inquiry" is successful, a Slave responds to the Master with its information.
- Interconnection between the Master and the Slave is achieved only if the information from the Slave is corresponded with the Master, and the Slave sends data to the Master.

2 Product Overview

FBS100BC has been developed to replace the previous RS232 Cable system and HID Keyboard- Mouse Device with wireless communication system to use.

Major Features of FBS100BC

1. Bluetooth Specification 2.1 Support
2. Easily applicable to the Product with 20Pins SMD(Surface-Mount Device) type
3. Support AT Command, and capable to control FBS100BC by using AT Command.
4. Easy to connect to use with Bluetooth PDA, Bluetooth USB Dongle, etc.
 - A. FBS100BC-SPP : RS232 Cable Replacement Device.
 - B. FBS100BC-HID : HID Keyboard-Mouse Device.
5. Provides the most compact size among Class 2.
6. Simply support the function of Bluetooth Firmware Update
7. Stable Data Transmission / Receipt

※ **We request the new users of FBS100BC-SPP/HID to read the information on this description carefully before they start to use the products.**

3 FBS100BC-SPP Components

3.1 FBS100BC-SPP

MODEL	PICTURE	Q'TY (EA)
FBS100BC-SPP		1

<Table 3-1 Basic Components of FBS100BC-SPP>

3.2 PC Interface Kit (Option)

MODEL	PICTURE	Q'TY (EA)
FBZx5Xxx (Interface Board)		1
Expansion Board		1
FCA180SC (RS232 Serial Cable)		1
FCA100UC (USB Power Cable)		1
FCA001PO (DC Power Adapter - 5V) (Option)		1

<Table 3-2 Components of PC Interface Kit >

※ If you find any of above components is defective, or not included in the package, please contact the seller you purchased.

<Table 4-1 FBS100BC-SPP Pin Description>

5 PC Interface Board (Jig Board)

<Figure 5-1 FBS100BC-SPP Interface Board(Jig Board)>

No.	Title	Description
1	Power ON/OFF Switch	ON/OFF the electric power of interface board.
2	USB/RS232 Interface Selection Switch	The switch for selection of communication in USB/RS232 (The 3 switches shall be set in same direction.)
3	PC Configuration/Operation Selection Switch	Not is use

4	FASET Switch	The switch for changing the environment setting value of FBS100BC-SPP to the factory setting value. The procedures to make the FASET are as followings. 1. Power ON 2. Press the FASET switch more than 2 seconds.
5	POWER LED	LED to check the power supply condition
6	STATUS LED	LED to check the action of FBS100BC-SPP
7	TX LED	LED to check the data output condition of FBS100BC-SPP
8	RX LED	LED to check the data input condition of FBS100BC-SPP
9	SERIAL INTERFACE LED	LED to check whether the communication interface is RS-232
10	USB INTERFACE LED	LED to check whether the communication interface is USB

<Table 5-1 FBS100BC-SPP Interface Board Description>

6 Performance of FBS100BC-SPP

No.	Part		Specification
1	Bluetooth Spec.		Bluetooth Specification 2.1 Support
2	Communication distance		10 M
3	Frequency Range		2402 ~ 2480MHz ISM Band
4	Sensitivity		-83dBm (Typical)
5	Transmit Power		4dBm(Typical)
6	Size		16.00 x 23.40 x 3.40 mm
7	Support Bluetooth Profile		SPP (Serial Port Profile)
8	Input Power		3.3V
9	Current Consumption		41mA (Max)
10	Temperature	Operating	-10°C ~ 50°C
		Limit Operating	-35°C ~ 55°C
11	Communication Speed		1,200bps – 230,400bps
12	Antenna		Chip Antenna
13	Interface		UART (TTL Level)
14	Flow Control		RTS, CTS support

<Table 6-1 FBS100BC-SPP Performance>

7 Current Consumption of FBS100BC-SPP

Status		Current Consumption (mA)		
		MIN	MAX	AVG
Standby		2	6	4
Inquiry scan & Page scan (Slave)		2	41	24
Page scan (Slave)		2	7	4
Inquiry (Master)		36	41	40
Connected	Slave	18	23	20
	Master	6	10	7
Data Transmission	Slave	24	30	28
	Master	18	27	21
Data Reception	Slave	21	33	26
	Master	21	33	27
Data Transmission/Reception	Slave	27	33	29
	Master	21	33	28
Power save	Slave	0	6	1
	Master	0	9	2

<Table 7-1 Current Consumption of FBS100BC-SPP>

TEST CONDITIONS

Baud Rate : 9600 bps, Input Voltage : DC 5V

The power consumption will change depending on transmission speed and volume of data.

8 FBS100BC-HID Components

8.1 FBS100BC-HID

MODEL	PICTURE	Q'TY (EA)
FBS100BC-HID	 A small green printed circuit board (PCB) with a white label in the center. The label contains the text '001901' and '37F747'. The PCB has several pins along its edges.	1

<Table 8-1 Basic Components of FBS100BC-HID>

8.2 Smart HID Interface Kit (Option)

MODEL	PICTURE	Q'TY (EA)
Smart HID Interface Board (Model : FBDx5xHID)	 A green printed circuit board (PCB) with various electronic components, including a large black integrated circuit (IC) in the center, several capacitors, and connectors along the edges.	1
Expansion Board	 A small green printed circuit board (PCB) with a white label in the center. The label contains the text '001901' and '37F747'. The PCB has several pins along its edges.	
RS232 Cable	 A black cable with a standard RS232 connector on one end and a smaller connector on the other.	1
USB Cable	 A grey cable with a standard USB connector on one end and a smaller connector on the other.	1
AVR Loader	 A small black device with a ribbon cable attached, used for loading firmware onto an AVR microcontroller.	1
CD	 A CD-ROM with a blue and white label. The label features the 'Firmtech' logo and some text.	1

<Table 8-2 Components of Smart HID Interface Kit>

※ If you find any of above components is defective, or not included in the package, please contact the seller you purchased.

11 Performance of FBS100BC-HID

No.	Part	Specification
1	Bluetooth Spec.	Bluetooth Specification 2.1 Support
2	Communication distance	10 M
3	Frequency Range	2402 ~ 2480MHz ISM Band
4	Sensitivity	-83dBm (Typical)
5	Transmit Power	4dBm(Typical)
6	Size	16.00 x 23.40 x 3.40 mm
7	Support Bluetooth Profile	HID Device
8	Input Power	3.3V
9	Current Consumption	41mA (Max)
10	Operating Temperature	-10°C ~ 50°C
11	Communication Speed	115,200 bps
12	Antenna	Chip Antenna
13	Interface	UART (TTL Level)

<Table 11-1 FBS100BC-HID Performance>

12 Current Consumption of FBS100BC-HID

Status	Current Consumption (mA)		
	MIN	MIN	MIN
Standby	2	6	4
Inquiry scan & Page scan (Slave)	2	41	24
Page scan (Slave)	2	7	4
Connected	18	23	20
Data Transmission	24	30	28
Data Reception	21	33	26
Data Transmission/Reception	27	33	29
Power save	0	6	1

<Table 12-1 Current Consumption of FBS100BC-HID>

TEST CONDITIONS

Baud Rate : 115200 bps, Input Voltage : DC 5V

The power consumption will change depending on transmission speed and volume of data.

13 FBS100BC-HID Input Data

- UART HID Report ID 1 Format (Keyboard)

Byte	Value	Description
0 (first byte in packet)	0x0c	Length of packet in bytes (12)
1	0x00	Type of packet: Forward HID Report
2	0xa1	HID input Report Header
3	0x01	Keyboard Report ID 1
4	0x00 to 0xff	Modifier Keys
5	0x00	Reserved
6	0x00 to 0xff	Keycode 1
7	0x00 to 0xff	Keycode 2
8	0x00 to 0xff	Keycode 3
9	0x00 to 0xff	Keycode 4
10	0x00 to 0xff	Keycode 5
11	0x00 to 0xff	Keycode 6

<Table 13-1 UART HID Report ID 1 Format>

- Modifier Keys

Bit	Bit 0	Bit 1	Bit 2	Bit 3	Bit 4	Bit 5	Bit 6	Bit 7
Description	LEFT CTRL	LEFT SHIFT	LEFT ALT	LEFT GUI	RIGHT CTRL	RIGHT SHIFT	RIGHT ALT	RIGHT GUI

<Table 13-2 Modifier Keys>

- Pointer Report Format (Mouse)

Byte	Value	Description
0 (first byte in packet)	0x08	Length of packet in bytes (8)
1	0x00	Type of packet: Forward HID Report
2	0xa1	HID input Report Header

3	0x02	Keyboard Report ID 2
4	0x00 to 0xff	Up to 5 buttons, one bit each
5	0x00 to 0xff	Delta X Number between -127 and +127 representing the change in mouse movement on the x-axis
6	0x00 to 0xff	Delta Y Number between -127 and +127 representing the change in mouse movement on the y-axis
7	0x00 to 0xff	Wheel movement Number between -127 and +127 representing the amount of wheel movement

<Table 13-3 Pointer Report Format>

- Mouse Button

Bit	Bit 0	Bit 1	Bit 2	Bit 3	Bit 4	Bit 5	Bit 6	Bit 7
Description	Left Button	Right Button	Middle Button	Always 1	Reserved	Reserved	Reserved	Reserved

14 Approval Information

14.1 KCC

14.2 FCC compliance Information

FCC Information to User

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Caution

Modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

FCC Compliance Information : This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference, and
- (2) this device must accept any interference received, including interference that may cause undesired operation

This device is intended only for OEM integrators under the following conditions:

- 1) The transmitter module may not be co-located with any other transmitter or antenna,
- 2) OEM shall not supply any tool or info to the end-user regarding to Regulatory Domain change.

As long as 2 conditions above are met, further transmitter test will not be required. However, the OEM integrator is still responsible for testing their end-product for any additional compliance requirements required with this module installed (for example, digital device emissions, PC peripheral requirements, etc.).

IMPORTANT NOTE: In the event that these conditions can not be met (for example certain

laptop configurations or co-location with another transmitter), then the FCC authorization is no longer considered valid and the FCC ID can not be used on the final product. In these circumstances, the OEM integrator will be responsible for re-evaluating the end product (including the transmitter) and obtaining a separate FCC authorization.

End Product Labeling

To satisfy FCC exterior labeling requirements, the following text must be placed on the exterior of the end product : **Contains Transmitter Module FCC ID : U8D-FBS100BC**

Manual Information To the End User

The OEM integrator has to be aware not to provide information to the end user regarding how to install or remove this RF module in the user's manual of the end product which integrates this module. The end user manual shall include all required regulatory information/warning as show in this manual.

14.3 CE

14.4 TELEC

14.5 SIG
