Re: FCC ID: U8ONB860

To whom it may concern,

Micronet purchases the W-Fi/BT module marked JORJIN WG7311-EA shown in internal photo 6 complete with the shield already affixed to it.

Micronet just attaches it to the PCB board of the M317 for which it is seeking FCC approval. Micronet does not remove the shielding nor is the shielding removable since it is soldered on.

Thank you.

Erez Cohen-Zedek

A handwritten signature in black ink that reads "Erez Cohen-Zedek". The signature is written in a cursive, flowing style.
