Declaration for compliance with FCC part 15.231(a)(2):

The transceiver programmable packet handler is used, supported by 64 byte FIFOs for TX and RX data.

The SW application uses variable packet length up to maximum 64 bytes.

By design, the maximum TX on-time including additional control data is 35.6 ms at a fixed bit rate of 20 kbps.

A handwritten signature in black ink, appearing to read 'Susanne Sundström', with a long horizontal stroke extending to the right.

Susanne Sundström
