Package Contents

Safety Precautions

- Read this guide carefully and keep it for future reference.
- Follow all instructions for safe use and handling of the product.
- Use the product within given temperature, humidity and voltage levels noted in the product's specifications.
- Do not disassemble the camera.
- Do not point the camera directly at the sun or a source of intense light.
- Periodic cleaning may be required. Use a damp cloth only. Do not use any harsh, chemical-based cleaners.

Disclaimers

- Not intended for submersion in water. Installation in a sheltered location recommended.
- This camera includes an Auto Mechanical IR Cut Filter. When the camera changes between Day/Night viewing modes, an audible clicking noise may be heard from the camera. This clicking is normal, and indicates that the camera filter is working.
- Audio recording without consent is illegal in certain jurisdictions. Lorex Corporation assumes no liability for use of its products that does not conform with local laws.

Product Overview

STEP 1: Preparation

Before beginning setup, there are some essential preparations to make.

To prepare for installation:

- **TURN OFF THE POWER RUNNING TO YOUR EXISTING DOORBELL AT THE BREAKER.**
- Remove your existing doorbell and disconnect wiring.

TIP: Bend the power cables so they do not fall through the hole in the wall.

- Remove the metal mounting plate from the back of the doorbell by removing the pre-inserted security screw on the bottom using the start end of the included screwdriver.

STEP 2: Secure the mounting bracket

Next, choose one of the following bracket installations based on where you are mounting the doorbell:

For installing on brick, stucco, or siding:

For installing on a metal door frame:

NOTE

For both installations, ensure the power cables from the wall fit comfortably through the hole in the mounting bracket.

STEP 3: Wiring the doorbell

Next, you will complete the wiring for your new doorbell.

STEP 4: Wiring the chime

You must determine the type of doorbell chime you have in your home: **electronic or mechanical**.

Not sure? If your doorbell chime is a classic **ding-dong** sound, chances are your chime is mechanical. If you are still not sure, remove the cover panel of your chime box - if you find spring-loaded levers and a physical metal chime, you have a mechanical chime.

For users with a mechanical chime, follow the extra steps below to complete the installation.

For mechanical chime owners:

- 1. Remove the cover panel of your doorbell chime box.
- 2. Loosen the **screws labeled FRONT and TRANS** using the Phillips end of the included screwdriver. Do not remove the screws, and be sure not to detach any connected wiring.

- 3. Connect the included chime kit to the green terminal on the end of the included wiring as shown below.

- 4. Connect the **wiring from the chime kit** to the **FRONT** and **TRANS** connectors in the chime box. Ensure that the existing wiring stays connected as well.

NOTE: You may connect either wire to either connector.

- 5. Mount the chime kit to the inside of your chime box, or along the cover plate, using the included double-sided tape.

IMPORTANT: Ensure the chime kit and wires are not touching the chimes or any moving components inside the chime box, or the doorbell chime will not sound correctly.

STEP 5: Connecting to the Lorex Home app

Finalize the physical installation of the doorbell and begin setup on the Lorex Home app.

- 1. Download and install the free **Lorex Home** app from the App Store or Google Play Store.
 - 2. Tap the Lorex Home icon to launch the app. Tap **Sign up**, then follow the on screen prompts to create an account. Record your account details below:
- Email: _____

Account Password: _____
- 3. Reconnect power to the doorbell at the breaker.
 - 4. Once the status LED on the doorbell is solid blue, tap **+**.
 - 5. Scan the QR code on the back of the doorbell using your mobile device's camera.
- NOTE:** If your mobile device cannot scan the QR code, tap **Manually enter Device ID**.
- 6. Press the **RESET** button on the back of the doorbell to enable the device hotspot.
 - 7. Tap **Next** in the Lorex Home app once the hotspot is enabled and the LED strip is pulsing.
 - 8. The app will connect your mobile device to the doorbell's hotspot.

- 9. Create a secure password for the camera. Record your camera password below:
- Doorbell Password: _____
- 10. Select your Wi-Fi network from the list, then enter the password to connect your doorbell to the Internet.
 - 11. Once the status LED on the doorbell is solid blue, tap **Next** to add the doorbell to your Lorex Home account.
 - 12. Set a name for the doorbel and configure date & time preferences, then tap **Complete** to finish the setup.

- 13. Insert the **included security screw** through the mounting bracket and into the screw hole on the bottom of the doorbell. Fasten tightly using the star-shaped end of the included screwdriver to complete the installation.
