Letter of Declaration on Standard Power AP Operation

Federal Communications Commission
7435 Oakland Mills Road
Columbia, MD 21046

To whom it may concern:

We, Cisco Systems, Inc., attest that this device under FCC ID UDX-600218010 complies with device protocol requirements and operational restrictions:

1. Device Protocol Attestation Statement:

- a. This device will contact an AFC system at least once per day to obtain the latest list of available frequencies and the maximum permissible power the standard power device may operate with on each frequency at the standard power device's location. If the device fails to contact the AFC system during any given day successfully, the standard device may continue to operate until 11:59 p.m. of the following day, at which time it will cease operations until it re-establishes contact with the AFC system and re-verifies its list of available frequencies and associated power levels - 15.407(k)(8)(iv).
- b. This device will automatically acquire geolocation and re-register with AFC to obtain frequency and power values after a power cycle.
- c. This device, if using an external geolocation source, will be connected to the standard power device via a secure connection that ensures only an approved external geolocation source provides geographic coordinates to the standard power device. Alternatively, an extender cable may be used to connect a remote receive antenna to a geolocation receiver within the standard power device.

2. Statement acknowledging device restrictions:

- a. Prohibited for control of or communications with unmanned aircraft systems, including drones.
