Subject: FCC ID: UH4MWT59

Mr. Fujimoto:

In order for processing of this permissive change application (FCC ID: UH4MWT59) to continue, the following issue(s) will have to be addressed:

- 1) The operational description states that the antennas can be used in a cross polarized configuration that may enable the receiver's better link performance. All of the test setup photos show both antennas polarized vertically. Were investigations made to measure the emission levels with the antennas either cross polarized, or with both antennas polarized horizontally?
- 2) Please indicate compliance with section 15.31(e) of the FCC rules.
- 3) Please provide a signed certification contract.

The item(s) indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information within 60 days of the original e-mail date may result in application dismissal and forfeiture of the filing fee. Also, please note that partial responses increase processing time and should not be submitted. Please upload responses and/or exhibits to the electronic filing website. Your correspondence number is UH4MWT59-1.

Best regards,

Scott McCutchan
