

Model Differences Letter

The LEITLINK has 4 variants which are functionally identical but have a difference in the number of solenoid valves that are allowed to be connected to the unit. There are no changes to the circuitry between variants other than the number of terminal blocks that appear on the terminal PCBA. The variants are LEITLINK 4GF-08, LEITLINK 4GF-16, LEITLINK 4GF-24, and LEITLINK 4GF-32. These variants are the models that will be listed under this certification.
