4 Product documentation

For production of this report the following product documentation has been used:

Description:	Date:	Identification:
Technical file Clay IQ-Repeater V 1.3	12/11/2013	 SALTO inspiredaccess

The above-mentioned documentation will be filed at Telefication for a period of 10 years following the issue of this test report.

5 Observations and comments

GSM module measurements are not included in the tests.

The variant model Clay-REPEATER differs from the Clay-IQ model in the sense that the GSM module has not been installed.

The devices are intended to be installed as wall-mounted or on a table. It appeared that in the test set up the highest emissions were obtained in the wall mount position. Therefore results of radiated emission tests with the device in this position are laid down in this report.

The device submitted for testing was equipped with built-in test modes.

6 Modifications to the sample

No modifications are made to the sample.

7 Summary

The product is intended for use in the following application area(s):

INTENTIONAL RADIATOR OPERATING IN THE FREQUENCY BAND 2400 - 2483.5 MHz

The sample is tested according to the following specification(s):

FCC part 15C, sections 15.207 and 15.247 (ed. 10-1-12);
